**Marketing 6.0** Philip Kotler, Hermawan Kartajaya, Iwan Setiawan, 2023-12-04 Rediscover the fundamentals of marketing along with the rise of metamarketing from the best in the business. In *Marketing 6.0*, the celebrated promoter of the Four P's of Marketing, Philip Kotler explains how marketers can use technology to address customers' needs and make a difference in the world. In a new age of metamarketing, this book provides marketers with a way to integrate technological and business model evolution with the dramatic shifts in consumer behavior that have happened in the last decade. Readers will learn about the building blocks of metamarketing: Generation Z and Generation Alpha and the technologies they use daily. How to tap into metaverses and extended reality. The potential obstacles and solutions for creating a more interactive and immersive experience. Marketing has evolved to address global challenges and changing customer expectations. *Academic Medicine - New Trends and Developments for the 2030s* Stanislaw P. Stawicki, 2025-10-01 Dating back to ancient civilizations around the world, medical education has become the foundation for the sustainable transmission of knowledge and skills required to heal the sick, treat the injured, and promote overall well-being. During the past two centuries, medical education has seen significant growth. This rapid growth corresponded to our evolving understanding of and the ability to treat various acute and chronic medical and surgical conditions. Beginning in the second half of the 20th century, the pace of medical progress and unprecedented aggregation of new knowledge resulted in the amalgamation of various academic medical pursuits into what we know today as academic medicine: a unique blend of education, leadership, research, and clinical excellence. Academic medicine is a noble pursuit and one of the essential constructs that have enabled innovation and new discoveries, making modern medical care more effective than ever before. Academic medicine also serves not only to generate new knowledge but also to sustain our civilizational progress by preserving existing knowledge, skills, and traditions accumulated over the millennia of the collective global history of medicine. The next decade promises to be a time of great

transition and opportunity for academic medicine There are many areas of great opportunity but there are also areas of deep concern It is the responsibility of medical academicians across all medical and surgical specialties to ensure that the next generations of physicians are provided with a solid foundation for professional growth and development spanning from state of the art medical education to cutting edge leadership development opportunities No matter the challenge an unwavering commitment to the principles of ethical and human centric frameworks must be maintained regardless of any other factors and considerations
