*Digital Progress and Trends Report 2023* The World Bank,2024-03-19 Digitalization is the transformational opportunity of our time The digital sector has become a powerhouse of innovation economic growth and job creation Value added in the IT services sector grew at 8 percent annually during 2000 22 nearly twice as fast as the global economy Employment growth in IT services reached 7 percent annually six times higher than total employment growth The diffusion and adoption of digital technologies are just as critical as their invention Digital uptake has accelerated since the COVID 19 pandemic with 1 5 billion new internet users added from 2018 to 2022 The share of firms investing in digital solutions around the world has more than doubled from 2020 to 2022 Low income countries vulnerable populations and small firms however have been falling behind while transformative digital innovations such as artificial intelligence AI have been accelerating in higher income countries Although more than 90 percent of the population in high income countries was online in 2022 only one in four people in low income countries used the internet and the speed of their connection was typically only a small fraction of that in wealthier countries As businesses in technologically advanced countries integrate generative AI into their products and services less than half of the businesses in many low and middle income countries have an internet connection The growing digital divide is exacerbating the poverty and productivity gaps between richer and poorer economies The Digital Progress and Trends Report series will track global digitalization progress and highlight policy trends debates and implications for low and middle income countries The series adds to the global efforts to study the progress and trends of digitalization in two main ways By compiling curating and analyzing data from diverse sources to present a comprehensive picture of digitalization in low and middle income countries including in depth analyses on understudied topics By developing insights on policy opportunities challenges and debates and reflecting the perspectives of various stakeholders and the World Bank s operational experiences This report the first in the series aims to inform evidence based policy making and motivate action among internal and external audiences and stakeholders The report will bring global attention to high performing countries that have valuable experience to share as well as to areas where efforts will need to be redoubled

**Models of the Mind** Grace Lindsay,2021-03-04 The human brain is made up of 85 billion neurons which are connected by over 100 trillion synapses For more than a century a diverse array of researchers searched for a

language that could be used to capture the essence of what these neurons do and how they communicate and how those communications create thoughts perceptions and actions The language they were looking for was mathematics and we would not be able to understand the brain as we do today without it In Models of the Mind author and computational neuroscientist Grace Lindsay explains how mathematical models have allowed scientists to understand and describe many of the brain s processes including decision making sensory processing quantifying memory and more She introduces readers to the most important concepts in modern neuroscience and highlights the tensions that arise when the abstract world of mathematical modelling collides with the messy details of biology Each chapter of Models of the Mind focuses on mathematical tools that have been applied in a particular area of neuroscience progressing from the simplest building block of the brain the individual neuron through to circuits of interacting neurons whole brain areas and even the behaviours that brains command Lindsay examines the history of the field starting with experiments done on frog legs in the late eighteenth century and building to the large models of artificial neural networks that form the basis of modern artificial intelligence Throughout she reveals the value of using the elegant language of mathematics to describe the machinery of neuroscience **The AI**
