How to Enhance Learning Efficiency When Online Learning is Popular and Indispensable: Theory, Research and Practice

Rong Lian, Chang Liu, Juzhe Xi, 2024-07-17 Online learning has become more and more common globally whether for comfort adapting to work hours or just having the freedom to study from anywhere. And now under the coronavirus pandemic as people are having to stay at home it has become more important than ever. Although the popularity of wireless network and portable smart device makes it possible for people to acquire and learn knowledge anytime and anywhere it does not necessarily mean an increased learning performance. Relevant research in cognitive science has revealed possible limitations in online learning. For example, the knowledge acquired through online learning tends to be fragmented and lacks guidance for integrated thinking among different subjects which makes it difficult for learners to form a systematic knowledge structure. Learners may experience cognitive overload, metacognitive illusion, and low learning efficiency in self-regulated learning. It follows that in the post COVID-19 era online learning puts forward new requirements and challenges to the contemporary students not only to their learning strategies but positive character traits in learning. Most of the current learning theories were developed in the early 20th century and may not fit in well with the current situation then possibly leading to inefficient learning and increased learning burden. Therefore it is necessary and important to reexplore the influencing factors and mechanisms that affect the learning efficiency of students at all levels nowadays based on which we could construct a theoretical model of efficient learning model.

Innovative Trends in Personalized Software Engineering and Information Systems Cleo Sgouropoulou, 2020-08-04 This book Innovative Trends in Personalized Software Engineering and Information Systems: The Case of Intelligent and Adaptive E-learning Systems studies the development of personalized and knowledge-based systems with the purpose of developing fully automated adaptive software mainly focusing on enhancing digital learning. The authors cover several integral phases of software engineering and their application in the effective implementation of sophisticated learning technology systems. Systems development and systems evaluation tailored to adaptive e-learning are examined in depth. More specifically intelligent and knowledge-based techniques such as artificial neural networks, fuzzy logic, genetic algorithms, pattern recognition, learning analytics, and data mining as well as evaluation frameworks adapted to digital learning software are presented. This publication will be of interest to scientists from various disciplines including computer science, artificial intelligence, education, and psychology and will help researchers working in computer science and engineering to build intelligent and adaptive learning technology systems by employing personalization techniques while following the basic concepts of software engineering and information systems. It will also serve as a valuable tool for junior and senior scientists supporting their research activities in the field of personalized and knowledge-based software engineering and instructors will be able to use the book as a guide to the effective design and development of intelligent systems in education.

AI in the Classroom Ross Smith, Mayte

Cubino, Emily McKeon, 2025-10-16 DESCRIPTION For thousands of years education has been shaped by technology from clay tablets and hornbooks to the printing press and now to digital learning platforms and remote education systems As artificial intelligence becomes more embedded in our daily lives its role in education continues to explode AI tools offer personalized instruction streamlined administrative tasks and enhanced student engagement creating a learning environment tailored to individual needs This book offers a guide to AI understanding and implementation in the classroom and how it makes personalized learning practical scalable and achievable for all Readers will understand how the advances in technology over time have led to improvements in education and how AI can enhance a personalized learning experience The authors go in depth to find the latest research to explore the implementation of AI strategies and technology in the classroom along with the critical and increasingly important focus on security privacy and ethical concerns By the end of this book the reader will have a robust understanding of AI and how it can help implement facilitate and augment personalized instruction strategies and techniques to support student learning and growth The future of education is here and it is intelligent adaptive and inspiring WHAT YOU WILL LEARN Leverage AI to personalize learning Prepare students for an AI integrated world Define a path for educators to navigate their professional development Clarify how this technology will influence administrators Gain insights into the ethical considerations of AI use How to communicate the benefits of AI to parents Enhance student engagement What to look out for to ensure student privacy WHO THIS BOOK IS FOR Written for educators administrators advanced students parents and policymakers looking to embrace the future of education This book will empower educators and administrators to build an innovative and inclusive educational environment with the assistance of AI Parents will benefit through deepening their understanding of AI and how it guides students toward success TABLE OF CONTENTS 1 AI and Personalized Learning 2 History of Technology in the Classroom 3 AI driven Assessment and Feedback Tools 4 Successful AI Implementations 5 Addressing Parental Concerns 6 AI for Diverse Learning Needs 7 Preparing for an AI driven Workforce 8 AI enhanced Professional Development for Educators 9 AI in Supporting Social emotional Learning 10 Data Security and Ethical Considerations in AI 11 Future of AI in the Classroom Trends in Artificial Intelligence and Computer Engineering Miguel Botto-Tobar, Omar S.
