A Beginner's Guide to Introduce Artificial Intelligence in Teaching and Learning Muralidhar Kurni, Mujeeb Shaik Mohammed, Srinivasa K G, 2023-06-28 This book reimagines education in today's Artificial Intelligence AI world and the Fourth Industrial Revolution. Artificial intelligence will drastically affect every industry and sector, and education is no exception. This book aims at how AI may impact the teaching and learning process in education. This book is designed to demystify AI for teachers and learners. This book will help improve education and support institutions in the phenomena of the emergence of AI in teaching and learning. This book presents a comprehensive study of how AI improves teaching and learning from AI-based learning platforms to AI-assisted proctored examinations. This book provides educators, learners, and administrators on how AI makes sense in their everyday practice. Describing the application of AI in ten key aspects, this comprehensive volume prepares educational leaders, designers, researchers, and policymakers to effectively rethink the teaching and learning process and environments that students need to thrive. The readers of this book never fall behind the fast pace and promising innovations of today's most advanced learning technology. Teaching Coding in K-12 Schools

Therese Keane, Andrew E. Fluck, 2023-02-27 This book contains highly effective ways to teach coding and computational thinking skills throughout primary and secondary schooling. It outlines a research-informed path for students from birth to 18 years, identifying key skills and learning activities. Based on global perspectives and research at each stage, it outlines how these findings can be applied in the classroom. Teaching coding to students in K-12 has been a skillset that has been debated across educational jurisdictions globally for some time. The book provides examples of schools that are teaching coding to students in engaging and relevant ways, delivering well-thought-out compulsory curriculums. Additionally, it provides examples of schools where coding is not mandated in the curriculum and is taught in an ad hoc manner. Through the full discussion of all of these varied examples, the book presents both sides of the serious and ongoing debate in the field as to whether coding should be taught in an explicit way at all. The increasing school of thought that teaching coding is a skill that is already obsolete and the focus should be on computational thinking is completely examined and presented. In this book, both sides of the argument as well as the specific meticulous research underlying each side are given equal weight. The debate is a serious one and requires a clearly defined thematic response with evidence on all sides of the argument presented rationally. This book does just that. Created by carefully selected authors from around the world, it will be a highly studied research reference.
