**Investment Strategies in the Age of Technological Innovation and Emerging Markets** Faxing, Liao, Kok Loang, Ooi, 2024-12-04 In the age of technological innovation and the rise of emerging markets investment strategies are evolving to capitalize on new opportunities and navigate complex risks As technologies like artificial intelligence AI blockchain and renewable energy reshape industries investors are looking for ways to use these advancements for long term growth At the same time emerging markets offer potential for returns but also present challenges including political instability currency fluctuations and regulation uncertainties Successful investment strategies require a blend of traditional financial understanding and an awareness of current technological and global market dynamics

Further exploration may help businesses and investors to take advantage of the transformative potential of these landscapes while mitigating risks and maximizing value. *Investment Strategies in the Age of Technological Innovation and Emerging Markets* explores the relationship between technological advancements, emerging market opportunities, and equity investment strategies. It offers a comprehensive analysis of their combined effects on the investment landscape. This book covers topics such as investor psychology, stock markets, and behavioral finance and is a useful resource for economists, business owners, investors, psychologists, scientists, academicians, and researchers. *Robo-Advisors in Management* Gupta, Swati, Taneja, Sanjay, Kumar, Vijay, Ozen, Ercan, Vardari, Luan, 2024-04-22. In the ever-evolving landscape of management, the introduction of robo advisors has introduced challenges and opportunities that require careful examination. Organizations grapple with the profound impact of these automated systems on decision-making processes, resource allocation, and strategic planning. The need for a comprehensive understanding of how robo advisors integrate into various management functions and sectors has become paramount. Decision makers, researchers, and students seeking clarity in this transformative period are faced with a shortage of literature that bridges theoretical insights with practical applications. *Robo Advisors in Management* stands out as a pioneering solution to this crucial gap in the existing body of knowledge. This book does not merely explore the challenges presented by robo advisors; it delves into the heart of these challenges and navigates the diverse applications of these technologies in sectors ranging from wealth management to healthcare and real estate. By seamlessly blending theoretical foundations with real-world scenarios, the book equips both professionals and academics with the tools needed to comprehend and harness the potential of robo advisors. It is an invaluable resource for decision makers looking to optimize their strategies, researchers seeking in-depth insights, and students aspiring to navigate the intersection of management and fintech. *Digital Progress and Trends Report 2023* The World Bank, 2024-03-19. Digitalization is the transformational opportunity of our time. The digital sector has become a powerhouse of innovation, economic growth, and job creation. Value added in the IT services sector grew at 8 percent annually during 2000-22, nearly twice as fast as the global economy. Employment growth in IT services reached 7 percent annually, six times higher than total employment growth. The diffusion and adoption of digital technologies are just as critical as their invention. Digital uptake has accelerated since the COVID-19 pandemic, with 1.5 billion new internet users added from 2018 to 2022. The share of firms investing in digital solutions around the world has more than doubled from 2020 to 2022. Low-income countries, vulnerable populations, and small firms, however, have been falling behind while transformative digital innovations such as artificial intelligence (AI) have been accelerating in higher-income countries. Although more than 90 percent of the population in high-income countries was online in 2022, only one in four people in low-income countries used the internet, and the speed of their connection was typically only a small fraction of that in wealthier countries. As businesses in technologically advanced countries integrate generative AI into their products and services, less than half of the businesses in many low and middle-income countries have

an internet connection The growing digital divide is exacerbating the poverty and productivity gaps between richer and poorer economies The Digital Progress and Trends Report series will track global digitalization progress and highlight policy trends debates and implications for low and middle income countries The series adds to the global efforts to study the progress and trends of digitalization in two main ways By compiling curating and analyzing data from diverse sources to present a comprehensive picture of digitalization in low and middle income countries including in depth analyses on understudied topics By developing insights on policy opportunities challenges and debates and reflecting the perspectives of various stakeholders and the World Bank s operational experiences This report the first in the series aims to inform evidence based policy making and motivate action among internal and external audiences and stakeholders The report will bring global attention to high performing countries that have valuable experience to share as well as to areas where efforts will need to be redoubled
