**Artificial Intelligence as a Disruptive Technology** Rosario Girasa, 2025-11-24 This book highlights the remarkable technological changes taking place today that are profoundly changing almost all aspects of society, including job creation and destruction, invasion of privacy to a degree nullifying its protection, the environment's replacement of human persons with machines, and innumerable other effects. The book focuses on the role of AI within a legal and regulatory context and explores in detail the attempts to obstruct major harms to society both in the United States and elsewhere. This book will be an invaluable resource for those working in this interdisciplinary field, exploring and using AI. It will also be a useful reference for students taking relevant courses as well as legal practitioners looking for an accessible introduction to the key issues brought about by the almost daily advances in digital technologies.

*The Co-evolution of Technology and Warfare* Tracey German, Fotios Moustakis, Andrew N. Liaropoulos, 2025-09-30 This book explores the relationship between technology and warfare by examining how recent technological advancements have revolutionized the conduct of war. The work analyses contemporary conflicts, including the Syrian civil war, the Taliban takeover in Afghanistan, and the ongoing war in Ukraine, but also by exploring future war scenarios and assessing the military capabilities of major powers. In doing so, the book highlights the dynamic and evolving nature of modern warfare. It goes beyond a simple examination of technological advancements, addressing the complexities of modern warfare, scrutinizing the strategies employed by states to adopt and develop military technologies, while emphasizing the importance of technology in shaping military planning, training, research, and innovation. The book provides a collection of timely contributions by leading scholars and practitioners in the military and security field. Furthermore, the contributors identify potential challenges and risks associated with the widespread adoption of technologies in warfare and propose recommendations for policymakers to address issues that relate to military planning and training, research and development, and resilience building. This book will
