The Feeling Economy Roland T. Rust,Ming-Hui Huang,2021-01-19 As machines are trained to think many tasks that previously required human intelligence are becoming automated through artificial intelligence However it is more difficult to automate emotional intelligence and this is where the human worker s competitive advantage over machines currently lies This book explores the impact of AI on everyday life looking into workers adaptation to these changes the ways in which managers can change the nature of jobs in light of AI developments and the potential for humans and AI to continue working together The book argues that AI is rapidly assuming a larger share of thinking tasks leaving human intelligence to focus on feeling The result is the Feeling Economy in which both employees and consumers emphasize feeling to an unprecedented extent with thinking tasks largely delegated to AI The book shows both theoretical and empirical evidence that this shift is well underway Further it explores the effect of the Feeling Economy on our everyday lives in the areas such as shopping
