Not My Barista Rachelle Ayala,2024-03-04 The cute barista is a wannabe writer and Gina Griffin doesn't date wannabe writers She's a bestselling women's fiction author and doesn't need to take a clueless beginner under her wing especially a handsome one who's so awkward with words that she finds endearing But Henry Archer is no ordinary barista He's a tech billionaire in disguise and the mastermind behind an AI chatbot designed to write like humans Henry is captivated by Gina's talent and determined to learn from her What Gina doesn't know is that he's also using her word choices to fine tune the very technology that she fears might render her craft obsolete As they grow closer Henry finds himself in a moral quandary torn between his growing feelings for Gina and the innovative technology that could change the writing industry forever Gina in turn is drawn to the charming barista with a passion for words warning him against using AI and teaching him to write from the heart Love is the last thing either one of them expects As Gina grows curious about Henry's identity and Henry frets over his newest breakthrough a hidden enemy forces his hand Will the exploding truth destroy Henry and Gina's budding romance or inspire the greatest love story ever written

The Almighty Machine Pekka Vahvanen,2022-02-25 The hymn of Digitalization is nothing new We must encourage the creation of new apps We must develop AI in order to prevail among international competition Technology's advance will halt climate change and let robots do the dumb stuff for us Our faith in technology is powerful because it has saved us in the past The Almighty Machine shows us technology's flip side The things that once powered us toward a brighter tomorrow are already undermining our quality of life The data stream has shattered our concentration human relationships have been reduced to a menu of emojis constant surveillance has nullified much of our privacy and the development of AI could be the beginning of the end for us We are becoming the casualties of our own success Pekka Vahvanen's bristling and timely critique deftly translated by Mark Jones throws doubt on the necessity of technological development in a world saturated in tech The Almighty Machine presents an important question Does progress no longer make us happier

The De Gruyter Handbook of Automated Futures Vaike Fors,Martin Berg,Meike Brodersen,2024-09-23 How does automation affect us our environment and our imaginations What actions should we take in response to automation Beyond grand narratives and technology driven visions of the future what more can automation offer With these questions in mind The De Gruyter Handbook of Automated Futures provides a framework for thinking about and implementing automation differently It consolidates automated futures as an inter and transdisciplinary research field

embedding the imaginaries interactions and impacts of automation technology within their social historical societal cultural and political contexts Promoting a critical yet constructive and engaging agenda the handbook invites readers to collaborate with rather than resist automation agendas It does so by pushing the agenda for social science humanities and design beyond merely assessing and evaluating existing technologies Instead the handbook demonstrates how the humanities and social sciences are essential to the design and governance of sustainable sociotechnical systems Methodologically the handbook is underpinned by a pedagogical approach to staging co learning and co creation of automated futures with rather than simply for people In this way the handbook encourages readers to explore new and alternative modes of research fostering a deeper engagement with the evolving landscape of automation
