Generative AI and Education B. Mairéad Pratschke, 2024-08-27 This volume addresses the gap in knowledge around generative AI and its applications in education It draws on the recent history of technological innovation and digital pedagogies locating generative AI in the contemporary discourse around education futures It argues

that a new hybrid model of education is emerging requiring educational institutions to embed generative AI into course and programme design delivery and assessment It also proposes a shift from a focus on learning as output to learning as a process and explores what that shift might look like Grounded in educational theory it offers actionable pedagogy informed guidance on how to position AI as a collaborator in the construction of learning in a manner that is congruent with the values and aims of education It offers advice based on evidence based digital pedagogy including frameworks for effective teaching and learning with generative AI that enable educators and designers to put these ideas into practice The book also explores the wider context informing this shift connecting narratives from governments and industry leaders on the strategic importance of generative AI and lifelong learning learning agility and future skills that make the case for the integration of competency based assessment into mainstream education Finally going beyond pedagogy and practice it considers some of the broader issues including limitations and ethics and the implications of integrating generative AI into institutional planning and design and includes a sample roadmap for education leaders to start the process of integrating generative AI into their institutions This work approaches the topic of generative AI from the vantage point of educators by addressing themes and concerns that will resonate with professionals in the sector

The Machine Mind Lauri Järvillehto, 2025-04-03 A thrilling intellectual voyage into the core questions concerning the human mind and artificial intelligence Can a machine think How is it possible that humans and AI can now communicate fluently The book compares the human mind with the generative AI solutions that have stunned the world and gets to the heart of the fundamental questions concerning the nature of the mind and thinking This book has been translated by AI The audio book is read by an AI voice How does the mathematical processing of an AI differ from the neural networks of the human brain In what ways are AI solutions and the human mind similar Is it a sensible idea to say a machine could really think The book describes what thinking is from the perspective of both the human mind and AI solutions It sheds light on the functioning of the human mind through the latest research in cognitive psychology neuroscience and philosophy of mind It explores artificial intelligence through computer science machine learning and neural network architectures After reading the book you will understand how the mind works what thinking is and what AI tools are really about Lauri Järvillehto PhD is a non fiction writer philosopher and musician
