### **Transforming Scholarly Publishing With Blockchain Technologies and AI** Gunter, Darrell Wayne, 2021-06-18

Every industry will be positively affected by blockchain and AI technology at some point. However, blockchain is a misunderstood technology within the publishing realm. The scholarly publishing industry can significantly improve the flow of research, drive down costs, and introduce new efficiencies in the publishing industry with these new technologies. The scholarly publishing industry is in its early days of the digital transformation, and blockchain and AI technology could play a major role in this. However, the industry has been resistant to change. These reasons include but are not limited to staying with legacy systems, cost of new platforms, changing cultures, and understanding and adopting new technologies. With proper research and information provided, the publishing industry can adopt these technologies for beneficial advancements and the generation of a bright future. *Transforming Scholarly Publishing With Blockchain Technologies and AI* explores the changing landscape of scholarly publishing and how blockchain technologies and AI are slowly being integrated and used within the industry. This book covers both the benefits and challenges of implementing technology and provides both cases and new developments. Topics highlighted include business model developments, new efficiencies in scholarly publishing, blockchain in research libraries, knowledge discovery, and blockchain in academic publishing. This book is a valuable reference tool for publishers, IT specialists, technologists, publishing vendors, researchers, academicians, and students who are interested in how blockchain technologies and AI are transforming and developing a modern scholarly publishing industry.

**Future of Digital Technology and AI in Social Sectors** Ertuğrul, Duygu Çelik, Elçi, Atilla, 2024-10-11 In a rapidly evolving digital landscape integrating emerging technologies presents unprecedented opportunities and complex challenges across various disciplines. As society navigates this transformation, there is a growing need for comprehensive insights into the implications of these advancements. This book serves as a vital resource offering a multidimensional exploration of how emerging technologies are reshaping the social sciences, education, law, and policy, tourism, health, environment, communication, business, and management, and security. Focusing on the intersection of technology and society, the *Future of Digital Technology and AI in Social Sectors* addresses pressing issues such as ethical dilemmas in technological advancement, the impact of automation on employment, and the moral and legal challenges of AI and data analytics. By providing a platform for researchers and practitioners to delve into these topics, the book aims to foster a deeper understanding of emerging technologies, implications, and opportunities across diverse fields.

*E-Learning for Geographers: Online Materials, Resources, and Repositories* Rees, Philip, MacKay, Louise, Martin, David, Durham, Helen, 2008-11-30 This book provides a useful reference to the latest advancements in the area of educational technology and e-learning. Provided by publisher.

[Digital Access and Museums as Platforms](#) Caroline Wilson-Barnao, 2021-07-25 *Digital Access and Museums as Platforms* draws on interviews with museum practitioners along with a range of case studies from public and private institutions in order to investigate the tensions and

benefits involved in making cultural collections available using digital technologies Taking a media and critical studies approach to the museum and raising questions about the role of privately owned search engines in facilitating museum experiences the book questions who collects what for whom objects are collected and what purpose these objects and collections serve Connecting fieldwork undertaken in Australia and New Zealand with the global practices of technology companies Wilson Barnao brings attention to an emerging new model of digital ownership and moderation Considering the synergising of these institutions with media systems which are now playing a more prominent role in facilitating access to culture the book also explores the motivations of different cultural workers for constructing the museum as a mediated location Digital Access and Museums as Platforms will be of interest to academics and students working in the fields of museum studies art culture media studies and digital humanities Weighing in on conversations about how technologies are being incorporated into museums the book should also be useful to practitioners working in museums and galleries around the world
