**Teaching Reading to American Indian/Alaska Native Students** Jon Reyhner, 2001 *Productive, Not Polarizing* Heather Kenyon Casey, This book co published with the National Science Teaching Association NSTA provides the support that K 12 teachers and students need for more complex science investigations Drawing on research that informs effective literacy practices this book pushes back on singular ideologies programs and divisive rhetoric and instead embraces an inclusive perspective for supporting literacy development and learning Readers are encouraged to move beyond debates that divide us and look toward the hard but necessary work of building the partnerships needed to support all students *Productive Not Polarizing* begins with a focus on community literacies and then describes effective literacy practices across grade levels Designed for a wide audience it will assist educators families and community partners to have informed conversations about what literacy instruction and learning involves Every chapter includes a Community Snapshot describing a real life scenario in which a partnering benefits students an Ideas for Action section that can be adapted to your own context reflection questions and a list of helpful resources that include potential sources of funding Book Features An accessible positive discussion of literacy research and practices for educators families and community partners A response to increasingly contentious conversations about literacy instruction Guidance to help educators engage with key community partners and stakeholders such as administrators families childcare centers afterschool programs and local school boards Opportunities to consider the role of teacher education and professional development in supporting school community conversations Ready to use resources such as reproducible materials and community planning and event guides **The Digital Future of English** Simone Murray, 2025-07-18 More than any other academic discipline literary studies is the creation of print culture How then can it thrive in the digital era Early 1990s predictions of the book s imminent demise presented a simplistic either or choice between the legacy of moribund print and triumphalist digital technology Yet we have grown to experience the two media as complexly interdependent and even complementary Clearly digital does not kill print But literary studies in the digital era cannot simply resume business as usual It is urgently necessary to reconsider the discipline s founding assumptions in light of digital technology The digital era prompts a rethinking of literary studies object of study as well as its methods theories audiences and pedagogical practices What counts as literature necessarily shifts in an age of proliferating born digital texts and do it yourself DIY online publication Where should literary studies sit institutionally and how might it graft contextually oriented social sciences methods onto its traditionally humanistic mode of textual analysis Why should literary study continue to marginalize emotional responses to texts when online communities bond via readerly affect Who is the audience for literary criticism in an age where expertise is routinely challenged yet communication with global book loving publics has never been technologically easier Finally how can we utilize digital tools to rejuvenate literary studies pedagogy and help English staff better connect with millennial age students Literary studies has been convulsed for decades by debates over

electronic literature and more recently digitally aided distant reading But these discussions still mostly confine themselves to demarcating our proper object of study We need to think more expansively about digital technology s impact on the underpinning tenets of the discipline Literary Media Studies is pitched at fellow literary scholars book historians media theorists cultural sociologists digital humanists and those working at the interface of these converging disciplines It models constructive engagement with contemporary digital culture Most importantly it brings a burst of sorely needed optimism to the question of literary studies digital future
