Transforming Special Education Through Artificial Intelligence Walters, Annette G., 2024-10-25 Special education encounters distinct challenges in delivering personalized and practical assistance to students with disabilities Educators

frequently require support to address the varied needs of these students resulting in learning and development gaps. Moreover, early identification and catering to these needs can take time and effort, affecting students' long-term academic success. There is an urgent need for innovative solutions that can bridge these gaps and improve the educational experiences of students with disabilities.

Transforming Special Education Through Artificial Intelligence offers a comprehensive exploration of how Artificial Intelligence (AI) can transform special education by providing personalized and individualized support for students with disabilities. Through case studies and real-life examples, we demonstrate how AI can analyze data to tailor learning experiences and, most importantly, identify learning difficulties early. This crucial aspect of AI can significantly enhance communication among stakeholders and reassure them about the potential of AI in improving educational outcomes for students with disabilities.

Youth, Faith, and Artificial Intelligence by Zaremozhzabieh, Zeinab, Abdullah, Rusli, Al-Issa, Riyadh Salim, Ahrari, and Seyedal, 2025-08-29, explores how AI continues to reshape society, its intersection with the younger generation, and the challenges faith has presented. Opportunities and ethical questions for the youth navigating their beliefs and identity have become increasingly difficult in this modern world. AI can serve as a tool and a hindrance to spiritual exploration and a challenge to traditional values. Faith communities, in turn, are grappling with how to engage youth meaningfully in an era shaped by algorithms, virtual interactions, and machine learning.

Youth Faith and Artificial Intelligence explores the rapid advancement of AI and its impact on the way we interact with the youth. This book examines how theological perspectives can help youth navigate the complexities of an AI-driven society. Covering topics such as AI youth and engagement, this book is an excellent resource for sociologists, researchers, academicians, educators, and more.
