Deep Fakes Michael Filimowicz, 2022-03-01 *Deep Fakes Algorithms and Society* focuses on the use of artificial intelligence technologies to produce fictitious photorealistic audiovisual clips that are indistinguishable from traditional video media. For over a century the indexical relationship of the photographic image and its related media of film and video to the scene of capture has served as a basis for truth claims. Historically the iconicity of these images has featured a causal traceback to actual light rays in a particular time and space which were fixed by chemical reactions or digital sensors to the resultant image. Today photorealistic audiovisual media can be generated from deep learning networks that sever any connection to an actual event. Should society instantiate new regimes to manage this new challenge to our sense of reality and the traditional evidential capacities of the mechanical image? How do these images generate information disorder while also providing the basis for legitimate tools used in entertainment and creative industries? Scholars and students from many backgrounds as well as policymakers, journalists, and the general reading public will find a multidisciplinary approach to questions posed by deep fake research from Communication, International Studies, Writing and Rhetoric.

The Metaweb Bridgit DAO, 2023-10-09 Buckle up for a fascinating journey through layers of insight and metaphors that explain the past, present, and future of the Web. Readers from all walks of life will learn something ancient, something novel, and something practical. Those who give it careful consideration will never see the Web the same way again. This book proclaims into existence decentralized public space above the webpage that enables the shift from personal to collective computing. The Web's next frontier is the Metaweb, a hyper-dimensional web over Today's Web that connects people and information silos with accountability and fair value exchange. The Metaweb can drastically reduce false information, abuse, and scams, as well as enable the unprecedented level of collaboration needed to address humanity's global challenges. The book posits a symbiotic relationship between AI and the Metaweb where AI assists in generating, organizing, and curating content while the Metaweb provides the necessary constraints, data, and context for AI to function effectively, transparently, and in alignment with humanity. The AI-assisted collaboration among humans on the Metaweb will enable a vast collective intelligence and the capture of tremendous untapped value. Integrating Educational Technology Into Teaching M. D. Roblyer, Jack Edwards, Mary Anne Havriluk, 1997

Psybersecurity Oliver Guidetti, Mohiuddin Ahmed, Craig Speelman, 2024-09-09 *Psybersecurity: Human Factors of Cyber Defence* is a clarion call to action in the face of a stark reality: over 90% of cyberattacks exploit human vulnerabilities, as highlighted by the 2022 Global Risks Report from the World Economic Forum. This gap between the rapid advancement of cyber security technologies and the slower pace of development in human-centric defences poses a formidable challenge to national security and personal safety. Amidst the dazzling progress of AI technologies like ChatGPT and Microsoft Security Copilot, the human element of cyber security remains critically underdeveloped. Set against the backdrop of the Australian government's ambitious goal to

become the world's most cybersecure nation by 2030 this book embarks on a mission to address the overlooked human factors in cyber defence. It advocates for a balanced approach that not only relies on technological advancements but also significantly enhances the human aspects of cyber security. Through an interdisciplinary exploration, *Psybersecurity* delves into how cyberthreats exploit human vulnerabilities and offers innovative solutions for building resilience against these vulnerabilities. It examines the necessity for cyber security strategies that encompass psychological insights, systemic resilience, and the mitigation of human errors, particularly within critical infrastructures and cyber-physical systems (CPS). Furthermore, this work critiques existing cyber security education frameworks, proposing a comprehensive curriculum that equips individuals with technical skills and the behavioural competencies needed to navigate the cyber landscape ethically and effectively. It also addresses AI's ethical dilemmas and psychological impacts, offering a forward-looking perspective on combating AI-driven harassment and endorsing a new field of study, *Psybersecurity: Human Factors of Cyber Defence*. This book aims to bridge the gap between cyber security and human sciences, ignite a transformation in understanding, and fortify our digital world. It is an essential read for academics, professionals, and anyone committed to building a safer, more resilient cyber future in alignment with Australia's 2030 vision.

[2084 and the AI Revolution, Updated and Expanded Edition](#) John C. Lennox, 2024-11-26

Will technology change what it means to be human? You don't have to be a computer scientist to have discerning conversations about artificial intelligence and technology. We all wonder where we're headed. Even now, technological innovations and machine learning have a daily impact on our lives, and many of us see good reasons to dread the future. Are we doomed to the surveillance society imagined in George Orwell's 1984? Mathematician and philosopher John Lennox believes that there are credible responses to the daunting questions that AI poses, and he shows that Christianity has some very serious, sensible, evidence-based things to say about the nature of our quest for superintelligence. This newly updated and expanded edition of 2084 will introduce you to a kaleidoscope of ideas: Key recent developments in technological enhancement, bioengineering, and in particular artificial intelligence; Consideration of the nature of AI systems with insights from neuroscience; The way AI is changing how we communicate, implications for medicine, manufacturing, and the military; its use in advertising and automobiles and education; and the future of work; How data is used today for surveillance, thought control; The rise of virtual reality and the metaverse; The transhumanist agenda and longtermism; The agreements and disagreements that scientists and experts have about the future of AI; The urgent need for regulation and control in light of the development of large language transformers like CHATGPT; Key insights from Scripture about the nature of human beings, the soul, our moral sense, our future, and what separates us from machines. In straight forward, accessible language, you will get a better understanding of the current capacity of AI, its potential benefits and dangers, the facts and the fiction, as well as possible future implications. Since the questions posed by AI are as daunting as they might be, affect most of us, they demand answers. 2084 and the AI Revolution, Updated and Expanded Edition has been written

to challenge and ignite the curiosity of all readers Whatever your worldview Lennox provides clear information and credible answers that will bring you real hope for the future of humanity

Alpocalypse Canceled: How to Separate Fact from Fear in the Age of Smart Machines Dizzy Davidson, 2025-08-05 If you worry that AI will steal your job or if you're tired of doom and gloom headlines or if you feel overwhelmed by conflicting tech jargon then this book is for you Why Intelligent Tech Won't Destroy Us and How You Can Ride the AI Wave to a Better Tomorrow Inside Alpocalypse Canceled you'll discover Clear myth busting of the top AI panic points from killer robots to self-aware machines Step by step guides to leverage free and low cost AI tools for work business and creativity Privacy first tips and tricks that you can implement today no tech degree required Real life stories of people who used AI to land jobs launch side hustles and solve community problems Lively illustrations and analogies that make even neural networks feel as simple as ABC Packed with actionable checklists practical examples and inside scoop interviews this book turns your AI anxieties into superpowers Whether you've just heard the term machine learning or you've dabbled in chatbots you'll emerge ready to shape the future instead of fearing it GET YOUR COPY TODAY

Four Battlegrounds Paul Scharre, 2023-02-28 An NPR 2023 Books We Love Pick One of the Next Big Idea Club's Must Read Books An invaluable primer to arguably the most important driver of change for our future P W Singer author of *Burn In* An award winning defense expert tells the story of today's great power rivalry the struggle to control artificial intelligence A new industrial revolution has begun Like mechanization or electricity before it artificial intelligence will touch every aspect of our lives and cause profound disruptions in the balance of global power especially among the AI superpowers China the United States and Europe Autonomous weapons expert Paul Scharre takes readers inside the fierce competition to develop and implement this game changing technology and dominate the future Four Battlegrounds argues that four key elements define this struggle data computing power talent and institutions Data is a vital resource like coal or oil but it must be collected and refined Advanced computer chips are the essence of computing power control over chip supply chains grants leverage over rivals Talent is about people which country attracts the best researchers and most advanced technology companies The fourth battlefield is maybe the most critical the ultimate global leader in AI will have institutions that effectively incorporate AI into their economy society and especially their military Scharre's account surges with futuristic technology He explores the ways AI systems are already discovering new strategies via millions of war game simulations developing combat tactics better than any human tracking billions of people using biometrics and subtly controlling information with secret algorithms He visits China's National Team of leading AI companies to show the chilling synergy between China's government private sector and surveillance state He interviews Pentagon leadership and tours U S Defense Department offices in Silicon Valley revealing deep tensions between the military and tech giants who control data chips and talent Yet he concludes that those tensions inherent to our democratic system create resilience and resistance to autocracy in the face of overwhelmingly powerful technology Engaging and direct Four Battlegrounds offers a vivid picture of how AI is

transforming warfare global security and the future of human freedom and what it will take for democracies to remain at the forefront of the world order
