Psybersecurity Oliver Guidetti, Mohiuddin Ahmed, Craig Speelman, 2024-09-09 Psybersecurity Human Factors of Cyber Defence is a clarion call to action in the face of a stark reality over 90% of cyberattacks exploit human vulnerabilities as highlighted by the 2022 Global Risks Report from the World Economic Forum This gap between the rapid advancement of cyber security technologies and the slower pace of development in human centric defences poses a formidable challenge to national security and personal safety Amidst the dazzling progress of AI technologies like ChatGPT and Microsoft Security Co Pilot the human element of cyber security remains critically underdeveloped Set against the backdrop of the Australian government's ambitious goal to become the world's most cybersecure nation by 2030 this book embarks on a mission to address the overlooked human factors in cyber defence It advocates for a balanced approach that not only relies on technological advancements but also significantly enhances the human aspects of cyber security Through an interdisciplinary exploration Psybersecurity delves into how

cyberthreats exploit human vulnerabilities and offers innovative solutions for building resilience against these vulnerabilities. It examines the necessity for cyber security strategies that encompass psychological insights, systemic resilience, and the mitigation of human errors, particularly within critical infrastructures and cyber-physical systems (CPS). Furthermore, this work critiques existing cyber security education frameworks, proposing a comprehensive curriculum that equips individuals with technical skills and the behavioural competencies needed to navigate the cyber landscape ethically and effectively. It also addresses AI's ethical dilemmas and psychological impacts, offering a forward-looking perspective on combating AI-driven harassment and endorsing a new field of study: Psybersecurity. **Psybersecurity: Human Factors of Cyber Defence** aims to bridge the gap between cyber security and human sciences, ignite a transformation in understanding, and fortify our digital world. It is an essential read for academics, professionals, and anyone committed to building a safer, more resilient cyber future in alignment with Australia's 2030 vision.

Story Machines: How Computers Have Become Creative Writers Mike Sharples, Rafael Pérez y Pérez, 2022-07-05. This fascinating book explores machines as authors of fiction, past, present, and future. For centuries, writers have dreamed of mechanical storytellers. We can now build these devices. What will be the impact on society of AI programs that generate original stories to entertain and persuade? What can we learn about human creativity from probing how they work? In *Story Machines*, two pioneers of creative artificial intelligence explore the design and impact of AI story generators. The book covers three themes: language generators that compose coherent text, storyworlds with believable characters, and AI models of human storytellers. Providing examples of story machines through the ages, it covers the history, recent developments, and future implications of automated story generation. Anyone with an interest in story writing will gain a new perspective on what it means to be a creative writer, what parts of creativity can be mechanized, and what is essentially human. *Story Machines* is for those who have ever wondered what makes a good story, why stories are important to us, and what the future holds for storytelling.
