Arts & Humanities Citation Index, 1987 A multidisciplinary index covering the journal literature of the arts and humanities It fully covers 1,144 of the world's leading arts and humanities journals and it indexes individually selected relevant items from over 6,800 major science and social science journals *How To Take Good Notes* Angelos Georgakis, 2017-06-25 Why would I need a book on how to take notes Notes are just notes FALSE Scientists have found that note taking can be as mentally demanding as playing chess can be for an expert While you take notes you listen carefully to the lecturer you process the new material you organize it in your working memory and you finally write down what you think is most important All this happens while someone is talking at an average speed of three words per second and someone is writing down at an average speed of one third of a word per second It doesn't sound easy now does it Notes are an important tool for learning We don't take notes just to record a few facts so we can review them later Learning happens as we take notes Taking notes the right way leads to good study practices better performance on exams and long term retention of information Note taking comes naturally FALSE Note taking is not obvious or intuitive Research has shown that students fail to capture 40% of the main points in a typical lecture First year students capture only 11% In some studies even the best note takers seem to record less than 75% of the important information People think they take good notes until they're told they don't Few of us have consciously thought about how we take notes let alone how to improve the quality of them We often reproduce the lecturer's phrases verbatim We don't save time by systematic use of abbreviations We fail to become a good psychologist of our lecturer We fail to pick up his enthusiasm We fail to interpret the tone of his voice We fail to read his body language And the result is that we fail to take good notes Anyway no one taught me how to take notes in school or in college TRUE Educators believe that students are able to assess the quality of their notes and follow good practices However studies have shown the exact opposite The fact that there isn't a course in college dedicated to the art of taking notes or learning in general makes students believe that this is a natural skill that they can perfect with practice over the course of their studies At the end of the day everyone has their own way to take notes TRUE In this book you may be surprised to learn

that I don't make any references to different types of note taking systems like those that other books do. The reason is that it's the practices behind the note taking that matter most. For example, you should not copy the lecturer's phrases word for word but generate the main points in your own words. And you should leave space on your notes for adding comments and testing yourself later. I encourage students to use the Cornell note taking system because it utilizes most of the principles of effective note taking. No matter which note taking system you decide to follow, the cognitive effort you will have to expend is equally high. Note taking may not be rocket science but it's definitely science: cognitive science. And cognitive science has produced a lot of useful insights that we can use now to take better notes. This book presents these insights in simple words so you can make the most of your notes and use them to study effectively. The title of this book is *How to take good notes*. However, note taking is just one part of the picture. Note taking is much broader in the context of this book. We take notes so we can interact with them later. What matters most is what we do with our notes after we finish taking them. Notes can do so many good things for you. They hold all your learning efforts. Treat them well. Look after them.

Notes Trina Alleyne, 2019-08-22

This is the Cornell method with a twist. How to use this notebook. When taking notes, it is always helpful to have a way to organize your notes and have a system of taking notes that works for you. This notebook is good for middle high school and college. Here are some tips and advice for note taking and using this notebook.

Before Taking Notes If you are able, look over the text before you go to class to take notes. This helps you to already have a mental picture of what you're about to learn. Find a pen or pencil you like. Having a writing utensil you enjoy using can make note taking more enjoyable. Have a good positive attitude about the subject you are learning. Having a good attitude helps you focus and remember what you are learning. If you don't feel like being in class, you are more likely to zone out or not pay attention.

Note Taking Legend This is where you can use colored pens to color in the color key next to each item. You can use the color key when you review your notes.

While Taking Notes **Main ideas column** You can use this column to record major sub headings, dates, key terms, or items that may be very important. **Notes column** Try not to record every word you hear. It will be very difficult and it may actually distract you from paying attention. If the speaker uses slides or handouts, use those to focus on key points. If the speaker does not, then just listen for the key points. You will get better with practice.

After Taking Notes **Summary Section** It is a good idea to use this section to summarize what you just learned in your own words. It will help you to remember the information. Share with someone what you learned. It is helpful to tell someone like a friend or family member what you learned. It is another way to remember and to check for understanding. Use colored sticky tabs to organize your notes for easier reference later.

Test Review This is where your colored pens come in handy. Using your color key and your pens, go over your notes line by line. Put a circle, square, or something around the item in your notes that matches your color key. Using the colors helps your brain to pay attention and remember what you learned. This will be the third time you have reviewed your notes. By the time you take a test, you would have reviewed the material at least 5 times. Looked over text before class. Took notes during class.

Wrote your notes summary afterwards Shared what you learned with someone Used colored pens for test prep
