Udaya Kumar, 2025-10-13 ICETSIMD 2025 was conceived as a vital platform for academicians researchers and industry leaders Its primary purpose was to explore the transformative potential of emerging technologies in driving sustainable development To ensure the high quality originality and relevance of the contributions all submissions to the ICETSIMD 2025 conference underwent a rigorous double blind peer review process We received 300 manuscript submissions from which 100 were selected for inclusion in the conference proceedings Each manuscript was evaluated by at least two independent experts based on criteria including scientific rigor methodological soundness clarity and contribution to the conference themes *AI in Daily Life* Michael Martin, 2025-08-15 AI isn't coming it's already here From the smartphone in your pocket to the apps that remember your shopping habits artificial intelligence is quietly shaping your everyday world AI in Daily Life How Artificial Intelligence is Transforming the Way We Live Work and Connect is your clear engaging guide to understanding and using this powerful technology in practical life changing ways Inside you'll discover how AI is Making your home smarter from automated appliances to energy saving systems Boosting your career with AI powered productivity tools research partners and creative assistants Transforming shopping personalized recommendations virtual try ons and fraud protection Revolutionizing health and wellness early detection personalized fitness and mental health support Enhancing learning adaptive lessons AI tutors and inclusive accessibility tools You'll also learn How to spot AI in your daily routines even where you least expect it The ethical challenges and risks we need to prepare for How to future proof your skills in an AI driven economy Whether you're a professional student entrepreneur or simply curious about what's next this book gives you the insider's edge on the most important technology of our time explained in plain English with real examples and tips you can start using today Step into the future with confidence because AI is already part of your life **Redesigning Organizations** Denise Feldner, 2019-12-11 This book offers readers a deeper understanding of the Cyberspace of how institutions and industries are reinventing themselves helping them excel in the transition to a fully digitally connected global economy Though technology plays a key part in this regard societal acceptance is the most important underlying condition as it poses pressing challenges that cut across companies developers governments and workers The book explores the challenges and opportunities involved current and potential future concepts critical reflections and best practices It addresses connected societies new opportunities for governments the role of trust in

digital networks and future education networks In turn a number of representative case studies demonstrate the current state of development in practice **Automation** ,1990 **Proceedings of the 2024 3rd International Conference on Social Sciences and Humanities and Arts (SSHA 2024)** Mohd Fauzi bin Sedon,Intakhab Alam Khan,Mehmet Cüneyt Birkök,KinSun Chan,2024-06-20 This is an open access book With the progress of social civilization social science and its research are becoming more and more important Theoretically and practically the study of social phenomena and social problems and the development of prosperous social sciences are the eternal themes of human beings At present social science research and its results can hardly meet the needs of social development especially the unscientific evaluation of social science results which has aroused great concern from all walks of life and has produced dirt and questions on social science thus affecting the proper development of social science Max Weber once said that the most important function of social science in modern times is to keep people clear headed and to resist the delusions of prophetic legislators Humanities and arts are the process of perceiving realizing thinking manipulating and expressing objective or subjective objects through capturing and excavating feeling and analyzing integrating and applying or displaying the stage results in the form obtained through feeling seeing hearing smelling touching The social sciences and humanities and arts contain content that will directly affect our lives and the way society functions And by reacting to today s increasingly intricate problems and situations through systematic and professional discussions they will further contribute to the improvement of institutions and the development of society By thinking about issues and looking at problems and the world from different perspectives by putting the two together it may be possible to have more comprehensive appropriate and better responses for example the development of laws requires a deeper understanding of the environment in which they are implemented international trade requires a certain understanding of the customs of different countries and the development of tax and economic policies requires a certain understanding of the population consumer demand etc **Artificial Intelligence and the Perspective of Autonomous Surgery** Konrad Karcz,Zbigniew Nawrat,Andrew A. Gumbs,2024-12-23 This book has two heroes the surgeon and the robot The education system and intelligence can create a human who is specialized in surgery While the accurate analysis of data with machine learning AI can create a more autonomous robot for surgery Currently robots still require human input in the decision making loop whether or not this will always be the case is an issue that still needs to be debated analyzed and studied preferably by computer scientists AND surgeons Surgeons and their patients are increasingly opting for less invasive surgeries However among their many advantages there is an important issue less invasiveness always means limited access to direct information from the operating field 3D image local palpation sensations all information about the whole patient and feedback from the accompanying team during teleoperation To increase precision we are increasingly using surgical robots and mechatronic instruments The less invasive the surgery and the greater the precision of robotic micro instruments the greater the role of artificial intelligence methods especially machine learning which supports the

surgeon in making decisions planning and performing the procedure The development of artificial intelligence and further evidence of its effectiveness in various application fields mean that the work of a doctor is changing today In the book we address the issue of AI surgery asking whether this means that an AI surgeon will be created A key question about autonomous surgical robots will come up regularly how far can we go with their autonomy while maintaining safe and effective procedures The book provides useful information on both early successes failures and expectations related to the development of new technologies in surgery It is a guide written by various experts intended for a wide audience from medical development planners through students to doctors and decision makers *Artificial Intelligence and*
