**Captivating Technology** Ruha Benjamin, 2019-06-07 The contributors to *Captivating Technology* examine how carceral technologies such as electronic ankle monitors and predictive policing algorithms are being deployed to classify and coerce specific populations and whether these innovations can be appropriated and reimaged for more liberatory ends.

Transmedia Creatures Francesca Saggini, Anna Enrichetta Soccio, 2018-10-19 On the 200th anniversary of the first edition of Mary Shelley's *Frankenstein*, *Transmedia Creatures* presents studies of *Frankenstein* by international scholars from converging disciplines such as humanities, musicology, film studies, television studies, English and digital humanities. These innovative contributions investigate the afterlives of a novel taught in a disparate array of courses. *Frankenstein* disturbs and transcends boundaries, be they political, ethical, theological, aesthetic and not least of media, ensuring its vibrant presence in contemporary popular culture. *Transmedia Creatures* highlights how cultural content is redistributed through multiple media forms and modes of production including user generated ones from below that often appear synchronously and dismantle and renew established readings of the text while at the same time incorporating and revitalizing aspects that have always been central to it. The authors engage with concepts, value systems and aesthetic moral categories among them the family horror, monstrosity, diversity, education, risk, technology, the body from a variety of contemporary approaches and highly original perspectives which yields new connections. Ultimately *Frankenstein* as evidenced by this collection is paradoxically enriched by the heteroglossia of preconceptions, misreadings and overreadings that attend it and that reveal the complex interweaving of

perceptions and responses it generates Published by Bucknell University Press Distributed worldwide by Rutgers University Press **Designing for Sex and Gender Equity** Isabel Prochner, 2023-12-19 Drawing on original designer interviews this book explores how design interventions can and do support sex and gender equity and what barriers still stand in the way Isabel Prochner not only brings attention to sex and gender problems related to design artifacts but also provides a unique overview of creative design responses to these issues The case studies and designer interviews provide new information about how designers can address these issues and the challenges they may encounter whether that s a lack of anthropometric data trouble finding investment and business support or even public resistance Prochner brings together primary and secondary research and the most contemporary theories on sex gender and design This book will be of interest to scholars working in design studies sex and gender studies social design design for health industrial design product design fashion design and interaction design
