Artificial intelligence suddenly seems to be everywhere, including in the world of education. With new AI-powered tools popping up every day, it's no wonder that educators might feel overwhelmed. How can we navigate the strange new world of AI without losing our humanity or our sense of humor? Blending thoughtful theology, practical wisdom and a deep love for teaching, this book invites educators to reflect on big questions: What does it mean to be a real human in an age of artificial intelligence? What tools should we adopt and which ones should we avoid, and how can we decide? How do we stay grounded in the gospel story while adapting to emerging technologies? Rather than offering easy answers or alarmist warnings, let's consider an approach that is curious and courageous: developing a hopeful vision for education that forms both minds and hearts. Standing on the truth of Scripture and keeping a finger on the tech pulse, this book helps Christian educators practice thinking faithfully, acting ethically and teaching joyfully, even when algorithms are everywhere. Teaching Christianly with technology isn't about keeping up with the latest tools and trends; it's about being the humans God created us to be. Heath, 2025-09-08. A practical guide for teachers and students navigating the complicated intersection of artificial intelligence, education and justice. In Critical AI in K-12 Classrooms, Stephanie Smith Budhai and Marie K. Heath draw attention to the biases embedded within AI algorithms, such as

those powering OpenAI's ChatGPT and DALL·E to guide students and teachers in developing strategies to best incorporate AI or not into equitable learning AI's reliance on existing data and knowledge systems means Black queer those with disabilities and other marginalized students are at greater risk of being harmed by built-in limitations and bias Budhai and Heath show how to circumvent if not actively resist such harms as machine learning NLPs LLMs and GenAI enter the classroom with practical examples rooted in culturally sustaining abolitionist and fugitive pedagogies across disciplines Their practical guide creatively answers the concerns of educators committed to forward thinking yet fair instruction and the needs of students eager to use AI for just ends Critical AI in K-12 Classrooms meets the challenges of a key STEM technology with an eye toward cultivating a more just world Balancing responsible learning with the joy of discovery Budhai and Heath build a framework for AI instruction that all educators can confidently use
