AI for Everyday People, 2025-09-07 Curious about Artificial Intelligence but not sure where to begin Feeling like everyone is talking about AI while

you're still on the sidelines. You're not alone. Whether you're a professional in your 40s wondering how AI might impact your career or a student from a smaller city eager to stay ahead in a fast-changing world, this book is your friendly first step into the world of AI. In *AI for Everyday People*, you'll discover:

- a) What AI really is, explained in plain, jargon-free language.
- b) How AI is already part of your daily life, even if you haven't noticed.
- c) Practical ways to use AI right now, from boosting productivity at work to studying smarter, writing emails faster, organizing tasks, and even creating blogs or social media posts.
- d) Step-by-step guidance to go from complete beginner to confident user.
- e) Real-life stories of how everyday people just like you are using AI to make life easier.

This is not a book for tech experts. It's for everyday people: professionals, students, small business owners, anyone who wants to understand and use AI without feeling overwhelmed. By the end of this book, you'll have the clarity, confidence, and skills to make AI work for you, whether in your job, your studies, or your daily life. The AI revolution is just beginning. With this book, you won't just catch up; you'll thrive.

The Promise of This Book: By the time you finish reading, you'll move from confusion (feeling left out of the AI conversation) to confidence (knowing how to use AI in your work, studies, and personal life). You'll learn what AI really is and isn't, discover simple ways to make it your assistant, and build the habits that will keep you future-ready without overwhelm. This isn't a book for tech experts; it's for everyday people: professionals in their 40s who think they're left behind, students who want to start with AI, small business owners, startups, an aspiring founder, parents to help their kids in study, etc., and anyone curious about how AI can help them.

A Gentle Invitation: Think of this book as your first step into a bigger world. Together, we'll take AI out of the headlines and put it into your hands as a tool you can trust, use, and grow with. So let's begin. The AI era isn't something to fear; it's something to embrace. And you're right on time.

Career Services and Workforce Development Centers for Libraries Raymond Pun, Arpine Eloyan, Michael R.

Oppenheim, 2024-11-18

With the rise of unemployment, increased career growth opportunities, and changing workforce demographics, libraries can support job seekers in several ways. *Career Services and Workforce Development Center for Libraries: A Guide* serves as a resource for libraries interested in creating, supporting, or enhancing their career services, economic, and workforce development programs for their communities. Going beyond collection development and hosting job fairs, activities, the book covers teaching resources and interviews from library leaders supporting workforce development initiatives or collaborations. Ideas on how libraries can be embedded in the workforce development community by providing a series of job readiness activities, programs, and services show academic and public librarians how to support their users exploring career opportunities and development. It examines employment trends and resources such as generative artificial intelligence to dive into these issues so libraries can stay active in identifying new skill development and technologies to support their communities. How can one start a career services or job center program in their libraries? What are specialized career services in libraries being offered? How can libraries advocate for funding for workforce development? Divided into five chapters, each chapter addresses these questions and provides a series of examples, ideas, and resources for readers to consider replicating.

Radical Reporting Sara I. James, 2025-01-31 If I were giving out an award for book of the year for internal audit professionals I would certainly award it to her outstanding manuscript Radical Reporting Writing Better Audit Risk Compliance and Information Security Reports Richard Chambers Former President and CEO The Institute of Internal Auditors Most people dread writing reports they also dread reading reports What they don t realize is that the techniques that make writing more readable make it more powerful This is especially relevant for professionals in areas such as audit risk compliance and information security This small volume provides the tools and techniques needed to improve reports It does so through addressing crucial concepts all too often overlooked in the familiar rush to perform tasks complete projects and meet deadlines These concepts the role of culture in communication the link between logic and language the importance of organizing thoughts before writing and how to achieve clarity may seem academic or theoretical They re not Unless writers understand their own thoughts actions and objectives they cannot hope to communicate them at all let alone clearly This

second edition develops these points with additional material on critical thinking as well as the use of AI in reporting

Mathematics and Education in an AI Era Dragana Martinovic, Marcel Danesi, 2025-04-25 This book focuses on the potential contributions of Artificial Intelligence AI for enhancing mathematics education It includes rationales for an AI oriented pedagogical model such as interdisciplinarity and even sensitivity to crucial world issues such as climate change The chapters in this book highlight what the new age of mathematics education entails concretely covering themes from the utilization of AI directly into classroom pedagogy and the semiotic consequences of what this entails to how mathematics training can be tailored to get students to relate concretely to problems of climate change and to understand the relevance of the differences between symmetry and asymmetry as psychological constructs The overall picture we can glean from these chapters is not mere eclecticism but an integration of disciplinary perspectives into a holistic framework that has great relevance and resonance for mathematics education in the age of AI
