**Higher Education, Place, and Career Development** Rosie Alexander, 2024-11-21 Drawing connections between the findings of a research project following young graduates from the Scottish islands of Orkney and Shetland, current international evidence, and theoretical literature, this book argues that understanding rural and island student transitions can expose the wider dynamics of place and mobility at play during student and early career experiences. Highlighting the importance of a career perspective, Rosie Alexander encourages readers to consider how career pathways develop across time and across transition points, unsettling the notion of a straightforward transition through university into the workplace. The book uncovers how student trajectories are developed through interweaving dynamics of relationships, place, and career routes, and unpacks the implications for policymakers and practitioners. It contends that a much greater spatial awareness is necessary to understand and support the educational and career pathways of higher education students. This is a crucial read for higher education researchers, policymakers, and students interested in rurality, as well as access to and transition from higher education.

**Remotely Innovative** Tom Coughlan, David Fogarty, 2025-07-23 In the near term, the future will not belong to AI, but it will belong to the people who understand AI and how to strategically leverage its advantages. This book gives managers a new perspective on innovation and AI, allowing them to seize the future. As the pace of change has increased, organizations have needed to invest in innovation initiatives to survive and thrive. Up until now, these models have focused on co-location, which is no longer an option in some cases and may not be necessary for all leaving organizations.

**After the Pandemic** Randy Whitaker, 2022-10-10 Many things define a job seeker experience education first impressions connections passion and the value you might bring to the company you wish to work for For decades the perceived ideal candidate would have all of the above most of the above however a good candidate would have a four year college degree To a great extent an employer still would like someone with a four year college degree However I believe this is changing The need for those who work with their hands and those who are willing to work their way up through the various levels of an organization is becoming more and more desired by companies The time it will take you to earn your degree you could be making a nice living and will have accrued zero debt in the process Plus after working in an industry of your choice something you do have an interest in even a passion for you may be on equal footing with a newly hired college grad based on the four years you have been working in your industry of choice as you continue to work your way up through the company You will find the more value you bring to a company the more they will look to you to assume great responsibility Typically the more responsibility the greater the paycheck What makes this book timely is the fact as COVID 19 winds down we are seeing many labor shortages in many areas and industries Now is the absolute best time to go to an industry experiencing a labor shortage or enter one of the numerous industries researched in this book and get yourself the job you always wanted without the cost and time involved with getting a four year college education I have nothing against getting a degree and there are still many fields where they will always be mandatory however the trades service industries government railroads law enforcement plus many others will welcome you with open arms without the need for a four year degree I hope this book helps
