Popular Ai Podcast Editor For Men:

Podcasting in a Platform Age John L. Sullivan, 2024-01-25 Podcasting in a Platform Age explores the transition underway in podcasting by considering how the influx of legacy and new media interest in the medium is injecting professional and corporate logics into what had been largely an amateur media form. Many of the most high profile podcasts today however are produced by highly skilled media professionals some of whom are employees of media corporations. Legacy radio and new media platform giants like Google, Apple, Amazon and Spotify are also making big and expensive moves in the medium by acquiring content producers and hosting platforms. This book focuses on three major aspects of this transformation: formalization, professionalization and monetization. Through a close read of online and press discourse, analysis of podcasts themselves, participant observations at podcast trade shows and conventions and interviews with industry professionals and individual podcasters, John Sullivan outlines how the efforts of industry players to transform podcasting into a profitable medium are beginning to challenge the very definition of podcasting itself.

Evaluating Digital Sources in Journalism Ståle Grut, 2023-12-28 Building on a rich journalistic tradition of critical source analysis, this book considers the impact of the move from analogue to digital sources on information quality and presents methods and tools to verify information found online and help counter the spread of misinformation. *Evaluating Digital Sources in Journalism* critically maps the prevalence of online manipulation, particularly images and videos from social media platforms and considers the tools needed both to carry out and to counter this. Strategies are proposed to help readers evaluate content, context and sources and ultimately build a foundation for carrying out their own online open source investigations. The author brings together theories and best practices from a broad range of literature including modern Scandinavian research on the concept of source criticism, journalism and technology studies, advanced forensic verification research and literature designed for practitioners including blogs and industry publications. *Evaluating Digital Sources in Journalism* is recommended reading for advanced journalism students and journalism practitioners.

Social Media for Journalists Frances Yeoman, Steve Harrison, 2025-12-29 This book offers a concise guide to using social media ethically and responsibly for journalism. Focusing on the essential practical skills that journalists need to operate successfully across multiple social media platforms, *Social Media for Journalists* takes readers step by step through the entire journalistic process from story generation and newsgathering through content creation and verification to dissemination and audience interactivity and considers how one can best utilise social media at every stage. The book considers legal and ethical implications of social media use, providing students with opportunities to reflect on the difference between what they can do and what they should do given the tools at their disposal. Other critical topics introduced include the use of artificial intelligence, ensuring mental wellbeing and the continued importance of journalists in a society in which everyone can publish widely. Each chapter takes a quick reference Q & A format and draws on case studies and examples from around the world and across various fields of journalism. *Social Media for Journalists* is an essential
