Get ready to take control of your future and claim your spot in one of the most dynamic job markets of our time.

Proceedings of 3rd International Conference on Recent Trends in Machine Learning, IoT, Smart Cities and Applications Vinit Kumar Gunjan, Jacek M. Zurada, 2023-02-23. The book is a collection of best selected research papers presented at the International Conference on Recent Trends in Machine Learning IoT Smart Cities and Applications ICMISC 2022 held during 28-29 March 2022 at CMR Institute of Technology Hyderabad, Telangana, India. This book will contain the articles on current trends of machine learning, internet of things, and smart cities applications, emphasizing on multi-disciplinary research in the area of artificial intelligence and cyber-physical systems. The book is a great resource for scientists, research scholars, and PG students to formulate their research ideas and find the future directions in these areas. Further, this book serves as a reference work to understand the latest technologies by practicing engineers across the globe.

Object Detection with Deep Learning Models S. Poonkuntran, Rajesh Kumar Dhanraj, Balamurugan Balusamy, 2022-11-01. Object Detection with Deep Learning Models discusses recent advances in object detection and recognition using deep learning methods which have achieved great success in the field of computer vision and image processing. It provides a systematic and methodical overview of the latest developments in deep learning theory and its applications to computer vision, illustrating them using key topics including object detection, face analysis, 3D object recognition, and image retrieval. The book offers a rich blend of theory and practice. It is suitable for students, researchers, and practitioners interested in deep learning, computer vision, and beyond, and can also be used as a reference book. The comprehensive comparison of various deep learning applications helps readers with a basic understanding of machine learning and grasp the theories and inspires applications in other computer vision tasks. Features: A structured overview of deep learning in object detection; A diversified collection of applications of object detection using deep neural networks; Emphasize agriculture and remote sensing domains; Exclusive discussion on moving object detection.

Design ,1985 Artificial Intelligence in Real-time Control (AIRC-2000) I. J. Ruda,J. K. Tar,2001 This Proceedings contains the papers presented at the 9th IFAC AIRC 2000 Symposium on Artificial Intelligence in Real Time Control 2000 held at Budapest Polytechnic Hungary on 2 4 October AIRC 2000 builds on the excellent reputation of previous meetings in the series for providing top quality papers in this important research field A positive development illustrated by this Proceedings is a new trend towards pragmatism in the research field Examples of this trend are an increase in the number of actual industrial applications support for more widespread use of new sophisticated technologies e g materials design further intertwining of artificial intelligence and control theory methods that reduces the reliance on blind faith still too often

associated with AI methods Many things have changed since the first AIRTC event in 1988 Two examples illustrate the change in the general attitude of the IFAC family in 1990 one of the major closing presentations of the IFAC World Congress warned the control community about the coming hordes of AI people In 1999 one of the plenary papers at the IFAC World Congress pointed out that the AI based methods form a natural extension of control theory to the class of non linear systems with incomplete information at least as far as the optimisation is concerned This contrast in attitudes shows how during the past decade many AI people have embraced control theory and many control people have learned the basics of AI This Proceedings serves to continue this excellent dialogue by providing many quality papers which link both fields **CIRP**
