Klaus Otten

How To Get Into Hybrid Work Schedule Online:

Agency, Change and Learning Julian Randall, Bernard Burnes, 2023-12-05 Despite the plethora of books on change there appears a notable gap in the field rarely is the authentic and candid voice of change agents heard How often do academics or practitioners candidly state what they actually do when they are faced with managing change in their own organisations or when they are called on in a consultancy capacity In this new book the editors bring together a diverse group of contributors who have worked as Internal Change Agents in organizations to divulge what they really do and think about change The authors draw on their own research work involving change agents and their change interventions and include current reflections on the post Covid world of work and the change required for achieving change interventions successfully Each contribution offers perspectives from real change programmes in both the public and private sector offering a unique opportunity to move beyond theory and understand change in practice The book offers valuable insights for academics and students of organisational change and behaviour leadership and organisational development *Virtual Services in the Health Sciences Library* Amanda R. Scull, 2022-05-15 Selected as a 2025 Doody's Core Title Virtual services have been part of health sciences libraries for a long time in various forms including the provision of reference and research services via email or chat availability of online instruction access to electronic materials and the curation of virtual research guides But when the COVID 19 pandemic forced many libraries to close their doors and pivot to virtual services almost overnight Moving all services remote even for just a short time did highlight what worked well and what did not The situation increased visibility of these services and made patrons more aware of what was available perhaps making them more likely to expect and use those services in the future In some ways the pandemic showed us ways in which virtual services could even be better than in person services for providing prompt patron services The situation increased visibility of existing services making users more aware of what was available and revealed gaps and needed improvements in virtual services In this book copublished by the Medical Library Association librarians from academic to hospital health sciences libraries from rural to urban areas and across a range of service specialties provide blueprints and best practices for building and maintaining sustainable virtual services in health sciences libraries Each chapter in this volume addresses aspects of providing virtual services in information and access services reference and instruction collections and clinical services written by contributors who have been involved in this work in their own libraries Whether you are just beginning an implementation assessing and refining current offerings or strategizing for sustainability and looking to the future this book will provide practical advice tools and considerations for maximizing user engagement and satisfaction with virtual library services and resources
