No Bs Youtube Shorts Ideas Usa:

No bullshit guide to math and physics Ivan Savov, 2014-08-07 Often calculus and mechanics are taught as separate subjects. It shouldn't be like that. Learning calculus without mechanics is incredibly boring. Learning mechanics without calculus is missing the point. This textbook integrates both subjects and highlights the profound connections between them. This is the deal: Give me 350 pages of your attention and I'll teach you everything you need to know about functions, limits, derivatives, integrals, vectors, forces, and accelerations. This book is the only math book you'll need for the first semester of undergraduate studies in science. With concise, jargon-free lessons on topics in math and physics, each section covers one concept at the level required for a first-year university course. Anyone can pick up this book and become proficient in calculus and mechanics regardless of their mathematical background.

Power, Privilege, and Public Health in the United States Lorraine T. Dean, 2025-03-31 *Power, Privilege, and Public Health in the United States* discusses the ways in which power and privilege along intersectional axes of race, gender, sexual orientation, ability, and other characteristics show up in public health and medicine practice, teaching, and research. It provides foundational knowledge on theories in power and privilege as well as historical examples of the ways in which the health and medical fields have been complicit in creating inequities and maintaining oppressive structures that can be used to understand health distribution differences and disparities. In order to enact real change, the contributors to this textbook enrich their chapters with practical guidance for developing anti-oppression competencies as well as example experiential activities to examine how our own power and privilege influence the design and interpretation of health studies and public health practice. In addressing directly the actors and institutions that have led to unequal health outcomes, *Power, Privilege, and Public Health in the United States* does more than simply highlight the problems that plague American healthcare; it actively engages students and readers from across a number of academic backgrounds, from public health and epidemiology to psychology and social work, with the tools to enact change straight from leading experts in academia and public health practice.

Brand Storytelling Keith A. Quesenberry, Michael K. Coolsen, 2023-02-14 This innovative new text introduces students to the power of storytelling and outlines a process for creating effective brand stories in a digital-first integrated marketing communications plan. From the earliest works on storytelling to the latest research, this text explains why and how storytelling works, the forms storytelling takes, and how to develop an integrated advertising, PR, and strategic marketing communications campaign that leverages the power of story within the reality of today's digital-first media landscape. Keith A. Quesenberry and Michael K. Coolsen present a balance of research and theory with practical application and case studies within a classroom-friendly framework for undergraduate or graduate courses or for the marketing communications professional looking for a guide to integrate storytelling into their brand communications. Emphasizing digital and social media perspectives in the strategic planning and campaign process, *Brand Storytelling* also surveys TV, radio, outdoor, print opportunities as well as earned, shared, owned, and
