multimedia processing **Transforming Healthcare with Big Data and AI** Alex Liu, Anna Farzindar, Mingbo Gong, 2020-04-01 Healthcare and technology are at a convergence point where significant changes are poised to take place. The vast and complex requirements of medical record keeping coupled with stringent patient privacy laws create an incredibly unwieldy maze of health data needs. While the past decade has seen giant leaps in AI machine learning, wearable technologies, and data mining capacities that have enabled quantities of data to be accumulated, processed, and shared around the globe, *Transforming Healthcare with Big Data and AI* examines the crossroads of these two fields and looks to the future of leveraging advanced technologies and developing data ecosystems to the healthcare field. This book is the product of the Transforming Healthcare with Data conference held at the University of Southern California. Many speakers and digital healthcare industry leaders contributed multidisciplinary expertise to chapters in this work. Authors' backgrounds range from data scientists, healthcare experts, university professors, and digital healthcare entrepreneurs. If you have an understanding of data technologies and are interested in the future of Big Data and AI in healthcare, this book will provide a wealth of insights into the new landscape of healthcare.

The Power of Ideas Zhiyi Liu, 2022-12-08 As the first academic monograph that a Chinese scholar discusses the histories of thoughts and ideas related to the development of digital economics, this book aims to make research from the perspective of the history of ideas and discuss the ideas influencing the development of digital economics and the evolution of related theories and thoughts with the methodology of interdisciplinary research. The human society is in the stage of major historic transition and enters the digital world with the main goal of developing the artificial world. In this world, the development of digital economics is significantly characterized by the deep interaction between the real and the virtual worlds, while the key triggering this paradigm reform is the evolution of ideas since the modern times. While involving the field of computer, these thoughts are also related to the fields of philosophy, ethics, communication, and economics. Therefore, the results of the research on the history of ideas related to digital economics are required to really understand the depth of this discipline. If computationalism is the most important paradigm evolution of natural science, the most important paradigm evolution of social science is interdisciplinary complex science. In the meantime, this book is the most significant in understanding the nature of paradigm evolution related to the development of digital economics from the perspective of complex science and interdisciplinary systematic researches. Digital economics is in the foundation-laying phase while this book mainly aims to historically narrate the thoughts of this discipline and hopes that readers can understand the influence of ideas in the old era on shaping the disciplines in the new era while exploring this new discipline. The construction of digital economics is a process of evolution. This book will be helpful to understand the underlying logic of the ideas constructed by the thinkers in different fields.
