

# The Ultimate Guide to AI Blog Writing – What You Need to Know

# Popular Ai Blog Writer Guide Online

**Mike Sharples, Rafael Pérez y Pérez**

## Popular Ai Blog Writer Guide Online:

### **How to Enhance Learning Efficiency When Online Learning is Popular and Indispensable: Theory, Research and Practice**

Rong Lian, Chang Liu, Juzhe Xi, 2024-07-17 Online learning has become more and more common globally whether for comfort adapting to work hours or just having the freedom to study from anywhere. And now under the coronavirus pandemic as people are having to stay at home it has become more important than ever. Although the popularity of wireless network and portable smart device makes it possible for people to acquire and learn knowledge anytime and anywhere it does not necessarily mean an increased learning performance. Relevant research in cognitive science has revealed possible limitations in online learning. For example, the knowledge acquired through online learning tends to be fragmented and lacks guidance for integrated thinking among different subjects which makes it difficult for learners to form a systematic knowledge structure. Learners may experience cognitive overload, metacognitive illusion, and low learning efficiency in self-regulated learning. It follows that in the post COVID-19 era online learning puts forward new requirements and challenges to the contemporary students not only to their learning strategies but positive character traits in learning. Most of the current learning theories were developed in the early 20th century and may not fit in well with the current situation then possibly leading to inefficient learning and increased learning burden. Therefore it is necessary and important to reexplore the influencing factors and mechanisms that affect the learning efficiency of students at all levels nowadays based on which we could construct a theoretical model of efficient learning model.

*Story Machines: How Computers Have Become Creative Writers* Mike Sharples, Rafael Pérez y Pérez, 2022-07-05 This fascinating book explores machines as authors of fiction past present and future. For centuries writers have dreamed of mechanical storytellers. We can now build these devices. What will be the impact on society of AI programs that generate original stories to entertain and persuade? What can we learn about human creativity from probing how they work? In *Story Machines* two pioneers of creative artificial intelligence explore the design and impact of AI story generators. The book covers three themes: language generators that compose coherent text storyworlds with believable characters and AI models of human storytellers. Providing examples of story machines through the ages it covers the history, recent developments and future implications of automated story generation. Anyone with an interest in story writing will gain a new perspective on what it means to be a creative writer, what parts of creativity can be mechanized and what is essentially human. *Story Machines* is for those who have ever wondered what makes a good story, why stories are important to us and what the future holds for storytelling.

*Textual Intelligence* Meenakshi Malik, Preeti Sharma, Susheela Hooda, 2025-07-23 The book is a must-have resource for anyone looking to understand the complexities of generative AI, offering comprehensive insights into LLMs, effective training strategies and practical applications. *Textual Intelligence: Large Language Models and Their Real World Applications* provides an overview of generative AI and its multifaceted applications as well as the significance and potential of Large Language Models (LLMs).
