

DEPENDENCY THEORY

Dependency theory explains the global economic system by describing how developing countries depend on developed countries for economic growth.

DEFINITION

Lustig explains dependency theory as a:

“body of thought that explains the persistent poverty of most developing countries by the fact that they are dependent on advanced countries for trade, investment, and technological progress” (Lustig, 1977)

EXAMPLE

Colonial exploitation

The earliest example of dependency is colonization when European nations made colonies through their superior military technology. They exported natural resources from other places to Europe. They then manufactured these materials and sold them back into colonies, creating an economic system of exploitation.
