

Context

- Depression-era America – late 1920's and 30's
- Steinbeck had done this kind of work

Themes

- Men struggling to take some part of the world for their own, but unable to.
- Honesty, love, compassion, and romance (?).

Criticism:

Characters are one-dimensional. The **moral** of the story is more important than the story.

Depression in Context Christopher R. Martell, Michael E. Addis, Neil S. Jacobson, 2001 This book represents one of the last contributions of Neil Jacobson to the study of depression At the time of his death he Christopher Martell and Michael Addis had just begun writing In fact they had spent several years discussing behavioral approaches to treating depression and had been collaborating on one of the largest clinical trials for depression comparing behavioral activation to cognitive therapy and medication Preliminary findings suggest that treating depression by helping to activate people behavioral activation is just as effective as helping them to change their thinking cognitive therapy Behavioral activation is a positive approach to treating depression Within this framework the therapist helps clients to see depression not as something inside of them but as a natural consequence of the way they cope with the shifting contexts of daily life There is no search for mental illness skill deficits or distortions in thinking Rather the therapist coaches the client to engage in activities that will lead to a more rewarding life This book is arranged in three parts Part I reviews theories of depression and various treatments for depression particularly pharmacological treatments cognitive therapy and behavioral therapy Part II describes the behavioral activation treatment approach and provides ample case transcript material Part III looks at problems that can arise in therapy and at future opportunities for the use of behavioral activation

Depression in Context Psychoeducation Staff, Christopher R. Martell, 2000-12-01 **Preventing Mental Illness in Practice** Dr Jennifer Newton, Jennifer Newton, 2013-04-15 In this follow up to Preventing Mental Illness Jennifer Newton describes real life examples of good practice in preventive mental health Five areas covering the life span have been identified and promising strategies are described in detail what is provided how the target group is engaged the resources required management problems and evidence of effectiveness Interviews with both clients and providers help to bring to life the descriptions as we learn how the support came to be needed and what benefits they themselves feel have been reaped These descriptive studies together with criteria for judging the efficacy of interventions provide an excellent resource for planners and policy makers The book will also be invaluable to those who seek to implement preventive policies in their day to day work lives such as social workers clinical psychologists health visitors community psychiatric nurses and general practitioners

Work, Happiness, and Unhappiness Peter Warr, 2011-01-25 Award winning psychologist Peter Warr explores why some people at work are happier or unhappier than others He evaluates different approaches to the definition and assessment of happiness and combines environmental and person based themes to explain differences in people s experience A framework of key job characteristics is linked to an account of primary mental processes and those are set within a summary of demographic cultural and occupational patterns Consequences of happiness or unhappiness for individuals and groups are also reviewed as is recent literature on unemployment and retirement Although primarily focusing on job situations the book shows that processes of happiness are similar across settings of all kinds It provides a uniquely comprehensive assessment of research published

across the world Initial chapters explore the several meanings of happiness and the ways in which those have been measured by psychologists The construct includes pleasure satisfaction and subjective well being and unhappiness has been studied in terms of dissatisfaction strain anxiety and depression The impacts of principal environmental features on these experiences are reviewed through an analogy with vitamins in relation to physical health beneficial only up to a point However environmental effects are not fixed Influences on happiness from within the person are examined in terms of principal thinking patterns personality styles and cultural backgrounds Differences are explored between groups men and women older and younger people employees who are full time and part time and so on and processes of person environment fit are placed within an overall framework which emphasizes the impact of variations in personal salience The book is written primarily for academic readers including senior undergraduates graduate students teachers and researchers in fields of Industrial Organizational Psychology Management Human Resources and Labor Studies However the topic s centrality in many professions makes it important also to a wider readership

Current and Emerging Issues in Cancer Pain Research and Practice C. Richard Chapman, Kathleen M. Foley, 1993

The Two Majorities and the Puzzle of Modern American Politics Byron E. Shafer, 2003 Where did the Era of Divided Government come from What sustains split partisan control of the institutions of American national government year after year Why can it shift so easily from Democratic or Republican presidencies coupled with Republican or Democratic Congresses How can the vast array of issues and personalities that have surfaced in American politics over the last forty years fit so neatly within indeed reinforce the sustaining political pattern of our time These big questions constitute the puzzle of modern American politics The old answer a majority and a minority party plus dominant and recessive public issues will not work in the Era of Divided Government Byron Shafer a political scientist who is regarded as one of the most comprehensive and original thinkers on American politics provides a convincing new answer that has three major elements These elements in combination not divided government as a catch phrase are the real story of politics in our time The first element is comprised of two great sets of public preferences that manifest themselves at the ballot box as two majorities The old cluster of economic and welfare issues has not so much been displaced as simply joined by a second cluster of cultural and national concerns The second element can be seen in the behavior of political parties and party activists whose own preferences don't match those of the general public That public remains reliably left of the active Republican Party on economic and welfare issues and reliably right of the active Democratic Party on cultural and national concerns The third crucial element is found in an institutional arrangement the distinctively American matrix of governmental institutions which converts those first two elements into a framework for policymaking year in and year out In the first half of the book Shafer examines how dominant features of the Reagan first Bush Clinton and second Bush administrations reflect the interplay of

these three elements Recent policy conflicts and institutional combatants in Shafer s analysis illuminate this new pattern of American politics In the second half he ranges across time and nations to put these modern elements and their composite pattern into a much larger historical and institutional framework In this light modern American politics appears not so much as new and different but as a distinctive recombination of familiar elements of a political style a political process and a political conflict that has been running for a much much longer time *Journal of Psychopathology and Behavioral Assessment* ,1988

California. Court of Appeal (2nd Appellate District). Records and Briefs California (State)., Number of Exhibits 4 The Mental Health Benefits of Work Denise Marie Zabkiewicz,2007 **Situating Sadness** Janet M. Stoppard,Linda M. McMullen,2003-05-01 It is well known that depression occurs more often in women than in men It is the most commonly encountered mental health problem among women and ranks overall as one of the most important women s health problems Researchers have studied depression a great deal yet women s depression has rarely been the primary focus The contexts of women s lives which might contribute to their depression are not often addressed by the mental health establishment which tends to focus on biological factors Situating Sadness sheds light on the influence of sociocultural factors such as economic distress child bearing or child care difficulties or feelings of powerlessness which may play a significant role and points to the importance of context for understanding women s depression Situating Sadness draws on research in the United States and other parts of the world to look at depression through the eyes of women exploring what being depressed is like in diverse social and cultural circumstances It demonstrates that understanding depression requires close attention to the social context in which women become depressed Locus of Control, Gender, and Social Support as Stress Moderators in Industrial Injury and Adaptation to Disability Elaine M. Tripi,1989 **Hispanic Journal of Behavioral Sciences** ,1997 Family Therapy Dorothy Stroh Becvar,Raphael J. Becvar,1993 The systemic cybernetic framework in Family Therapy provides a framework for understanding people and families in context The text divided into three sections including The Systemic Framework The Practice of Family Therapy and The Systemic Practitioner includes historical information current developments and ongoing debates Book jacket **The New Age** Arthur Moore,1929
