, *SAPONI, Spaces and Projects of National Importance* Bernd Scholl, 2012 Spaces and Projects of National Importance SAPONI are not only important for the respective spatial areas they are also in the interest of the entire nation and sometimes of European interest as well Over a three years period a series of different symposia with high level spatial planners from all over Europe had been focusing on these strategic spaces and projects The book sums up the findings of these issues which can have far reaching consequences and chances that could be used or they could be lost like the leader of the workshop series Prof Bernd Scholl points out **Cura Aquarum in Jordanien** Christoph P. J. Ohlig, Christoph Ohlig, 2008 **Dialects Across Borders** Markku Filppula, Juhani Klemola, Marjatta Palander, Esa Penttilä, 2005-12-21 Nonstandard varieties of languages have recently become an object of new interest in scholarly research This is very much due to the advances in the methods used in data collection and analysis as well as the emergence of new language theoretical frameworks The articles in this volume stem from the 11th International Conference on Methods in Dialectology Methods XI August 2002 Joensuu The theme for this conference was Dialects across borders The selection of contributions included in this volume demonstrates how various kinds of borders exert major influence on linguistic behaviour all over the world The articles have been grouped according to whether they deal primarily with the linguistic outcomes of political and historical borders between states Part I various kinds of social and regional boundaries including borders in a metaphorical sense i e social barriers and mental or cognitive boundaries Part II and finally boundaries between languages Part III **The German Language in a Changing Europe** Michael G. Clyne, 1995-11-16 Recent sociopolitical events have profoundly changed the status and functions of German and influenced its usage In this study published by Cambridge in 1984 Michael Clyne revises and expands his original analysis of the German language in *Language and Society in the German speaking Countries* in the light of such changes as the end of the Cold War German unification the redrawing of the map of Europe increasing European integration and the changing self images of Austria Switzerland and Luxembourg His discussion includes the differences in the form function and status of the various national varieties of German the relation between standard and non standard varieties gender generational and political variation Anglo American influence on German and the convergence of east and west The result is a wide ranging exploration of language and society in the German speaking countries all of which have problems or dilemmas concerning nationhood or ethnicity which are language related and or language marked **The Rhine** Mark Cioc, 2009-11-17 The Rhine River is Europe s most important commercial waterway channeling the flow of trade among Switzerland France Germany and the Netherlands In this innovative study Mark Cioc focuses on the river from the moment when the Congress of Vienna established a multinational commission charged with making the river more efficient for purposes of trade and commerce in 1815 He examines the engineering and administrative decisions of the next century and a half that resulted in rapid industrial growth as well as profound environmental

degradation and highlights the partially successful restoration efforts undertaken from the 1970s to the present The Rhine is a classic example of a multipurpose river used simultaneously for transportation for industry and agriculture for urban drinking and sanitation needs for hydroelectric production and for recreation It thus invites comparison with similarly overburdened rivers such as the Mississippi Hudson Colorado and Columbia The Rhine s environmental problems are however even greater than those of other rivers because it is so densely populated 50 million people live along its borders so highly industrialized 10% of global chemical production and so short 775 miles in length Two centuries of nonstop hydraulic tinkering have resulted in a Rhine with a sleek and slender profile In their quest for a perfect canal like river engineers have modified it more than any other large river in the world As a consequence between 1815 and 1975 the river lost most of its natural floodplain riverside vegetation migratory fish and biodiversity Recent efforts to restore that biodiversity though heartening can have only limited success because so many of the structural changes to the river are irreversible The Rhine An Eco Biography 1815 2000 makes clear just how central the river has been to all aspects of European political economic and environmental life for the past two hundred years
