Dermatology For The Small Animal Practitioner Exotics Feline Canine:

Dermatology for the Small Animal Practitioner Gene H. Nesbitt, Lowell J. Ackerman, 1991-01-01 *Pathology of Wildlife and Zoo Animals* Karen A. Terio, Denise McAloose, Judy St. Leger, 2018-10-08 *Pathology of Wildlife and Zoo Animals* is a comprehensive resource that covers the pathology of wildlife and zoo species including a wide scope of animal disease types and geographic regions. It is the definitive book for students, biologists, scientists, physicians, veterinary clinicians, and pathologists working with non-domestic species in a variety of settings. General chapters include information on performing necropsies, proper techniques to meet the specialized needs of forensic cases, laboratory diagnostics, and an introduction into basic principles of comparative clinical pathology. The taxon-based chapters provide information about disease in related groups of animals and include descriptions of gross and histologic lesions, pathogenesis, and diagnostics. For each group of animals, notable unique gross and microscopic anatomical features are provided to further assist the reader in deciding whether differences from the domestic animal paradigm are normal. Additional online content, which includes text, images, and whole scanned glass slides of selected conditions, expands the published material, resulting in a comprehensive approach to the topic. 2019 PROSE Awards Winner, Category Textbook, Biological and Life Sciences Association of American Publishers. Presents a single resource for performing necropsies on a variety of taxa, including terrestrial and aquatic vertebrates and invertebrates. Describes notable unique gross and microscopic anatomical variations among species taxa to assist in understanding normal features, in particular those that can be mistaken as being abnormal. Provides consistent organization of chapters with descriptions of unique anatomic features, common non-infectious and infectious diseases, following brief overviews of the taxonomic group. Contains full-color, high-quality illustrations of diseases. Links to a large online library of scanned slides related to topics in the book that illustrate important histologic findings.
