How Deflation Works Corona Brezina,2010-08-15 Though steadily falling prices over a prolonged period sounds like a good thing deflation is the ultimate vicious cycle When the money supply decreases due to tight credit a terrible cascade of negative reactions ensues often leading to severe economic contraction recession or depression If there is too little money circulating in the economy demand for goods drops as do prices If companies sell less at a lower profit they cut back on manufacturing of existing products and development of new ones They eventually are forced to release workers Unemployed workers spend even less on consumer goods so demand and prices dip even lower More layoffs occur and the negative cycle deepens This book is an invaluable guide to this most dangerous of economic cycles and offers the power of knowledge helping readers to adapt to shifting economic trends with comprehension historical perspective and sound advice and strategies

It'S Nothing Personal It'S Only Business William N. Spencer,2016-01-28 Today in America we are no longer the worlds largest market economy If anything the only thing greatest about the American economy is the amount of money we owe to other countries Politicians and activists portray big government as essential to safeguard the common good There is no question we need the government to protect our rights and assure the rule of law But overly large and politicized government ends up dominating and undermining a moral society Instead of empowering people big government programs from welfare subsidies to corporate bailouts promote dependency and deteriorate personal responsibility encouraging both people and companies to make bad decisions How did we as a country allow our students and our citizens in general to become so economically uneducated in just two generations
