China's Leaders David Shambaugh,2021-06-25 Since the founding of the People s Republic of China over 70 years ago five paramount leaders have shaped the fates and fortunes of the nation and the ruling Chinese Communist Party Mao Zedong Deng Xiaoping Jiang Zemin Hu Jintao and Xi Jinping Under their leaderships China has undergone an extraordinary transformation from an undeveloped and insular country to a comprehensive world power In this definitive study renowned Sinologist David Shambaugh offers a refreshing account of China s dramatic post revolutionary history through the prism of those who ruled it Exploring the persona formative socialization psychology and professional experiences of each leader Shambaugh shows how their differing leadership styles and tactics of rule shaped China domestically and internationally Mao was a populist tyrant Deng a pragmatic Leninist Jiang a bureaucratic politician Hu a technocratic apparatchik and Xi a modern emperor Covering the full scope of these leaders personalities and power this is an illuminating guide to China s modern history and understanding how China has become the superpower of today Also available as an audiobook **The World's Westward March** Peter F. Krogh,2020-06-25 In this book Peter F Krogh examines the major events and individuals which figured prominently in the movement of centers of initiative and of the world s main axis of commerce and communication from East to West over the last five hundred years The book follows the westward migration of the world s center of gravity from China in the fifteenth century across Eurasia to the Near East onward to Europe and then to America and now to the Pacific Rim The focus is on historical figures who by virtue of their vision and action led the movement It highlights what unfolds when a powerful idea is embraced by a formidable individual who pursues the idea with uncommon ability and intensity Along the way the book identifies qualities that make for leadership on a grand scale which aspiring leaders may find instructive and even inspirational **Deng Xiaoping** Michael Dillon,2014-10-27 One of the most important figures in global politics during the second half of the 20th century Deng Xiaoping is generally considered the central figure behind China s economic liberalization programme that produced historically unprecedented growth rates and development beginning in the late 1970s Lifting nearly a billion people out of poverty Deng Xiaoping s Four Modernisations called for reform in agriculture industry military and science and technology Today these reforms are considered to be the crucial

turning point in modern Chinese history enabling China to effectively harness its previously latent power in its quest to become a global economic superpower Just ten years after this tremendous achievement Deng's brutal suppression of the democracy movement at Tiananmen Square severely undermined his international and domestic reputation To explain the seeming contradictions between Deng Xiaoping's desire for economic liberalization and political conservatism Michael Dillon's biography utilizes recently released Chinese sources to detail Deng Xiaoping's emergence from a minority second class community in the Sichuan province via education in France to his meteoric rise to the top of the CCP's political hierarchy illustrating the ways in which his life of struggle and survival shaped his political career Dillon's biography addresses Xiaoping as both an intensely committed communist capable of playing a principal role in the Great Leap Forward from 1958 to 1961 while incurring the wrath of Mao only ten years later as he was exiled and purged during the Cultural Revolution Emphasizing Deng Xiaoping's effectiveness as a party operator and political bruiser rather than an intellectual capable of formulating the reforms for which he eventually took credit this book sheds light on Deng's ability to capitalize upon the planning expertise of other party members This biography of the central figure in China's economic liberalization is essential for any reader interested in or affected by China's rise to global prominence

Marxism and the Making of China J.

New China's Long March from Servility to Freedom Wei-Bin Zhang, 2007 This book is part of a broad study on Confucianism and its implications for the modernisation of East Asia The Opium War symbolises the beginning of foreign humiliations and the Cultural Revolution represents the apex of self oppression self intimidation and self humiliations China vainly strove under the guns of many countries until the end of World War II and since then has suffered from many civil wars Immediately after New China was established in 1949 the CCP closed the door to the outside democratic world thus creating self humiliations Since economic reform was launched in 1978 New China has been developed from the verge of nationwide self murder to the track for prosperity and freedom The long march from self destructiveness to social and economic progresses raises many challenging questions about human survival and processes Philosophical historical political and economic perspectives are discussed An open and enriching New China could dramatically affect the world in the not so distant future This book describes the history of New China as a dynamic process from the pole of central planning anti Americanism and anti Confucianism towards market economy Americanisation and modernising Confucian manifestations
