Der Blick Vom Turm Fabeln:

Der Blick vom Turm Günther Anders, 1968 **Der Blick vom Turm** Günther Anders, 1968 *Der Blick vom Turm* Günther Anders, 1989 **Four Philosophers and the Bomb** Alberto Castelli, Giunia Gatta, Micaela Latini, Francesco Raschi, 2025-02-11 In this book Alberto Castelli Giunia Gatta Micaela Latini and Francesco Raschi examine how four prominent intellectuals of the 20th century Bertrand Russell Karl Jaspers Raymond Aron and Günther Anders understood atomic warfare With a chapter devoted to the philosophical ideas of each thinker and how they understood and interpreted war the authors analyze the historic political context in which these ideas emerged and what they proposed to avoid a nuclear disaster *Four Philosophers and the Bomb* will be of interest to students and researchers of peace studies international relations political philosophy and moral philosophy **The Carousel of Indignation and Outrage** Arist von Schlippe, 2024-07-15 Conflicts have accompanied mankind since time immemorial and for almost as long people have been trying to limit and deal with them whether as those affected by them or as professionals with more or less success For once a system of conflict has developed once negative expectation structures and with them negative self evident truths and inherent laws have developed it becomes increasingly difficult for those involved to escape them The complexity of our social world in which it is not easy for communication to find its way remains unseen A violated sense of justice misunderstandings and unfortunate attempts to correct them alternate One begins to attribute the causes of the conflict to the person It's you It's your fault and to attribute negative motives to the conflict partner You're only doing this because who in turn does the same just like a carousel that slowly gets going A number of well studied but little known psychological processes occur within us when we are in conflict Outrage at the other person grows usually unfortunately on both sides Slowly the carousel of outrage and indignation begins to spin faster and faster until The book places the various psychological mechanisms in the context of a systemic understanding of conflict and explains ways to slow down the carousel **The Ethics of Survival in Contemporary Literature and Culture** Rudolf Freiburg, Gerd Bayer, 2021-12-14 The Ethics of Survival in Contemporary Literature and Culture delves into the complex problems involved in all attempts to survive The essays analyze survival in contemporary prose narratives short stories poems dramas and theoretical texts but also in films and other modes of cultural practices Addressing diverse topics such as memory and forgetting in Holocaust narratives stories of refugees and asylum seekers and representations of war the ethical implications involved in survival in texts and media are brought into a transnational critical discussion The volume will be of potential interest to a wide range of critics working on ethical issues the body and the politics of art and literature *Fabel* Erwin Leibfried, 2017-02-18 *Anthropology in the Age of Technology* Paul van Dijk, 2000 This book is the first to discuss for an English speaking audience the ideas of the German Jewish man of letters thinker and activist Günther Anders Anders is one of few philosophers to deal intensely with the moral consequences of Auschwitz and Hiroshima He can rightly be called the philosopher of the atomic age and his thinking a

philosophy of modern technology In biting manifestoes sharp aphorisms and penetrating essays in stirring diary notes and political fables Anders strikes out the age in which we live As a twentieth century visionary he exposes the absence of the moral and social imaginations that is necessary to prevent our history from ending in a total catastrophe In the gap between our technical creations and our utter inability to imagine their destructive potential lies the basis for the unstoppable activity of this practical philosopher From every possible angle he attempts to comprehend this modern schizophrenia in its roots and consequences Anders is one of the most important thinkers of the twentieth century He tried to describe and analyze the variety of manifestations of the self destructive progress of our technical civilization which makes humanity into an antiquated sort He diagnosed countless important problems ranging from the world of media to the dictates of the world of machinery and he investigated their social political and philosophical meaning To read his writings is more than becoming acquainted with a rich and colorful philosopher It is more than an encounter with a moving and passionate individual It is ultimately a confrontation with oneself with our own guilt and responsibility with our personal hopes and fears with our lack of imagination and with our need to recover it Widener Library Shelflist: German literature Harvard University.
