ART and the MIND – Ernst H. GOMBRICH Sybille Moser-Ernst, 2018-02-19 Ernst H Gombrich the Art Historian master of both Continental thought and English language became one of the world's most well known representatives of the discipline Half a century ago his testable theories transformed thinking on how to look at art After only a few years during which semiotics appeared to render Sir Ernst's common sense framework outdated the rise of cognitive approaches has enabled him to recover internationally the status he once had in France as a radical thinker within modern philosophy This book explores Gombrich's intellectual legacy by analysing some of the concepts and insights in the context of Image Science the *Steckenpferd* The international contributors are original authorities in their own right among them some of Gombrich's former students

Art History and Anthropology Peter Probst, Joseph Imorde, 2023-12-12 An in depth and nuanced look at the complex relationship between two dynamic fields of study While today we are experiencing a revival of world art and the so called global turn of art history encounters between art historians and anthropologists remain rare Even after a century and a half of interactions between these epistemologies a skeptical distance prevails with respect to the disciplinary other This volume is a timely exploration of the roots of this complex dialogue as it emerged worldwide in the colonial and early postcolonial periods between 1870 and 1970 Exploring case studies from Australia Austria Brazil France Germany and the United States this volume addresses connections and rejections between art historians and anthropologists often in the contested arena of primitive art It examines the roles of a range of figures including the art historian anthropologist Aby Warburg the modernist artist Tarsila do Amaral the curator impresario Leo Frobenius and museum directors such as Alfred Barr and René Harnoncourt Entering the current debates on decolonizing the past this collection of essays prompts reflection on future relations between these two fields

The Optic of Walter Benjamin Alex Coles, 1999 With particular focus on the city glass architecture and themes of historiography collecting and ethnography Walter Benjamin's methodology of telescoping the past through the present is put into focus in this book
