Der Ochsenkrieg:

, Filming the Middle Ages Bettina Bildhauer, 2013-06-01 In this groundbreaking account of film history Bettina Bildhauer shows how from the earliest silent films to recent blockbusters medieval topics and plots have played an important but overlooked role in the development of cinema Filming the Middle Ages is the first book to define medieval films as a group and trace their history from silent film in Weimar Germany to Hollywood and then to recent European co productions Bildhauer provides incisive new interpretations of classics like Murnau's *Faust* and Eisenstein's *Alexander Nevsky* and she rediscovers some forgotten works like Douglas Sirk's *Sign of the Pagan* and Asta Nielsen's *Hamlet* As Bildhauer explains both art house films like *The Seventh Seal* and *The Passion of Joan of Arc* and popular films like *Beowulf* or *The Da Vinci Code* cleverly use the Middle Ages to challenge modern ideas of historical progress to find alternatives to a print dominated culture and even to question what makes us human Filming the Middle Ages pays special attention to medieval animated and detective films and provactively demonstrates that the invention of cinema itself is considered a return to the Middle Ages by many film theorists and film makers Filming the Middle Ages is ideal reading for medievalists with a stake in the contemporary and film scholars with an interest in the distant past **Bulletin of the Deutsches Haus, Columbia**

University in the City of New York Columbia University. Deutsches Haus, 1929 **One-to-many-relations in morphology, syntax, and semantics** Berthold Crysmann, Manfred Sailer, 2021 The standard view of the form meaning interfaces as embraced by the great majority of contemporary grammatical frameworks consists in the assumption that meaning can be associated with grammatical form in a one to one correspondence Under this view composition is quite straightforward involving concatenation of form paired with functional application in meaning In this book we discuss linguistic phenomena across several grammatical sub modules morphology syntax semantics that apparently pose a problem to the standard view mapping out the potential for deviation from the ideal of one to one correspondences and develop formal accounts of the range of phenomena We argue that a constraint based perspective is particularly apt to accommodate deviations from one to many correspondences as it allows us to impose constraints on full structures such as a complete word or the interpretation of a full sentence instead of deriving such structures step by step Most of the papers in this volume are formulated in a particular constraint based grammar framework Head driven Phrase Structure Grammar The contributions investigate how the lexical and constructional aspects of this theory can be combined to provide an answer to this question across different linguistic sub theories *The Complete Index to Literary Sources in Film* Alan Goble, 2011-09-08 No
