Dermal And Ocular Toxicology Fundamentals And Methods:

Dermal and Ocular Toxicology David W. Hobson, 2020-11-25 *Dermal and Ocular Toxicology Fundamentals and Methods* is a procedurally oriented volume of detailed methods and practical examples discussing the dermal and ocular aspects of toxicology. The book is divided into a dermal section and an ocular section. Each section begins with a chapter on the anatomy and physiology of each organ system and then progresses to more specialized chapters discussing such topics as the toxicological pathology of each system, state of the art in vitro and in vivo evaluatory procedures, statistical considerations for test design and data interpretation, and the utilization of test findings. Test methods are provided for acute dermal exposure effects, dermal hypersensitivity and photoallergy assessment, dermal and ocular pharmacokinetics, skin flap and skin grafting techniques, and in vitro alternative methods. This book can be used as an instructional text or as a sourcebook for practicing toxicologists, pharmacologists, industrial hygienists, occupational health professionals, and graduate students.

Dermal and Ocular Toxicology David W. Hobson, 1989-09-01 Toxicology of the Skin Nancy A. Monteiro-Riviere, 2010-02-17 This key volume of the Target Organ Toxicology Series provides a fresh and modern approach to the subject of skin toxicology from the perspective of how the skin forms a barrier that protects the body from the external environment and how chemicals and drugs interact with the barrier properties of the skin. Any defects or perturbations to this barrier may result in damage to the skin or may alter absorption. With contributions from over 40 international experts in the field of skin biology, the book presents the central role of the skin barrier to health and disease, reviewing the skin's anatomy and physiology with focus on the stratum corneum as a barrier to foreign substances. Dermal absorption, cutaneous metabolism, and epidermal transporters. Altered barriers, racial skin types, aged skin, photoaged skin, cosmetics, and skin sensitization. Modern approaches to drug delivery across the skin barrier including liposomes, microneedle technology, active and passive transdermal delivery. Examples and case studies of chemical toxicity after topical exposures ranging from arsenic, metal working fluids, bromine, jet fuel, sulfur mustard, and including the emerging area of nanomaterial penetration. *Toxicology of the Skin* is essential reading for drug delivery, pharmacologist, formulation scientists, dermatologists, toxicologists, molecular biologists, engineers, surgeons, students, and anyone interested in skin irritation and skin absorption.
