Derrida and Deconstruction Hugh J. Silverman, 2004-01-14 The effects of Derrida's writings have been widespread in literary circles where they have transformed current work in literary theory By contrast Derrida's philosophical writings which deal with the whole range of western thought from Plato to Foucault have not received adequate attention by philosophers Organized around Derrida's readings of major figures in the history of philosophy Derrida and Deconstruction focuses on and assesses his specifically philosophical contribution Contemporary continental philosophers assess Derrida's account of philosophical tradition with each contributor providing a critical study of Derrida's position on a philosopher she or he has already studied in depth These figures include Plato Meister Eckhart Descartes Kant Hegel Nietzsche Freud Husserl Heidegger Sartre and Foucault

The Last Fortress of Metaphysics Francesco Vitale, 2018-02-01 Examines the relationship of Derrida's writings on architecture to his methodology of deconstruction and to deconstructivism in architecture Between 1984 and 1994 Jacques Derrida wrote and spoke a great deal about architecture both in his academic work and in connection with a number of particular building projects around the world He engaged significantly with the work of architects such as Bernard Tschumi Peter Eisenman and Daniel Libeskind Derrida conceived of architecture as an example of the kind of multidimensional writing that he had theorized in *Of Grammatology* identifying a rich common ground between architecture and philosophy in relation to ideas about political community and the concept of dwelling In this book Francesco Vitale analyzes Derrida's writings and demonstrates how Derrida's work on this topic provides a richer understanding of his approach to deconstruction highlighting the connections and differences between philosophical deconstruction and architectural deconstructivism Although there has been some discussion of the intersection of deconstruction and architecture in the past mostly among architects and architectural critics Vitale's work is distinguished by the fact that it is written by a true philosopher who has a much more acute sense than has usually been the case of the philosophical underpinnings of Derrida's exchanges with Tschumi Eisenman and others Vitale is throughout concise precise insightful and often brilliant Geoffrey Bennington author of *Interrupting Derrida*

Routledge Philosophy Guidebook to Derrida on Deconstruction Barry Stocker, 2006-04-18 Examining one of the most important and prolific figures in modern thought Barry Stocker offers a lucid introduction to key texts including *Speech and Phenomena* *Of Grammatology* and *Writing and Difference*

The Politics of Deconstruction Martin McQuillan, 2007-08-20 In this fine collection a group of distinguished scholars have produced the best book so far about Derrida's politics of the future J Hillis

Miller Distinguished Research Professor University of California at Irvine Jacques Derrida has had a huge influence on contemporary political theory and political philosophy Derrida's thinking has inspired Slavoj Žižek Richard Rorty Ernesto Laclau Judith Butler and many more contemporary theorists This book brings together a first class line up of Derrida scholars to develop a deconstructive approach to politics Deconstruction examines the internal logic of any given text or discourse It helps us analyse the contradictions inherent in all schools of thought and as such it has proved revolutionary in political analysis particularly ideology critique This book is ideal for all students of political theory and anyone looking for an accessible guide to Derrida's thinking and how it can be used as a radical tool for political analysis

Deconstruction and the Possibility of Justice Drucilla Cornell, Michel Rosenfeld, David Gray Carlson, 2016-05-13 The purpose of this volume is to rethink the questions posed by Derrida's writings and his unique philosophical positioning without reference to the catch phrases that have supposedly summed up deconstruction

Deconstruction - Derrida Julian Wouffrey, 1998-06-22 Deconstruction Derrida contests the notion that what Jacques Derrida does can be turned into a theory for literary interpretation It also questions the idea that there is a critical methodology called deconstruction which can be applied to literary texts in a programmatic fashion In this introductory study to the work of Jacques Derrida Julian Wouffrey introduces the reader to a range of Derrida's interests and concerns while offering readings informed by Derrida's thought of canonical and less well known literary works

Limited Inc Jacques Derrida, 2000 *Limited Inc* is a major work in the philosophy of language by the celebrated French thinker Jacques Derrida The book's two essays *Limited Inc* and *Signature Event Context* constitute key statements of the Derridean theory of deconstruction They are the clearest exposition to be found of Derrida's most controversial idea that linguistic meaning is fundamentally indeterminate because the contexts that fix meaning are never stable *Limited Inc* includes an important new afterword by the author

A Derrida Reader Jacques Derrida, 1991 This is the only available collection of Jacques Derrida's contributions to philosophy presented with a comprehensive introduction From *Speech and Phenomena* to the highly influential *Signature Event Context* each excerpt includes an overview and brief

summary *On the Name* Jacques Derrida, 1995 The name What does one call thus What does one understand under the name of name And what occurs when one gives a name What does one give then One does not offer a thing one delivers nothing and still something comes to be which comes down to giving that which one does not have as Plotinus said of the Good What happens above all when it is necessary to sur name renaming there where precisely the name comes to be found lacking What makes the proper name into a sort of sur name pseudonym or cryptonym at once singular and singularly untranslatable Jacques Derrida thus poses a central problem in contemporary language ethics and politics which he addresses in a linked series of the three essays *Passions An Oblique Offering* is a reflection on the question of the response on the duty and obligation to respond and on the possibility of not responding which is to say on the ethics and politics of responsibility *Sauf le nom Post Scriptum* considers the problematics of naming and alterity or transcendence raised inevitably by a rigorous negative theology Much of the text is organized around close readings of the poetry of Angelus Silesius The final essay *Khora* explores the problem of space or spacing of the word *khora* in Plato's *Timaeus* Even as it places and makes possible nothing less than the whole world *khora* opens and dislocates displaces all the categories that govern the production of that world from naming to gender In addition to readers in philosophy and literature *Khora* will be of special interest to those in the burgeoning field of space studies architecture urbanism design **Politics of Deconstruction**

Susanne Lüdemann, 2014-08-13 The book offers a new introduction to Jacques Derrida and to Deconstruction as an important strand of Continental Philosophy From his early writings on phenomenology and linguistics to his later meditations on war terrorism and justice Jacques Derrida 1930-2004 achieved prominence on an international scale by addressing as many different audiences as he did topics Yet despite widespread acclamation his work has never been considered easy Rendering accessible debates that marked more than four decades of engagement and inquiry Susanne Lüdemann traces connections between the philosopher's own texts and those of his many interlocutors past and present Unlike conventional introductions *Politics of Deconstruction* offers a number of personal approaches to reading Derrida and invites readers to find their own Emphasizing the relationship between philosophy and politics it shows that with Deconstruction there is much more at stake than an academic discussion for Derrida's work deals with all the burning political and intellectual challenges of our time The author's own professional experience in both the United States and in Europe which particularly inform her chapter on Derrida's reception in the United States opens a unique perspective on a unique thinker one that rewards specialists and newcomers alike

Derrida Geoffrey Bennington, Jacques Derrida, 1993-05 Geoffrey Bennington sets out here to write a systematic account of the thought of Jacques Derrida Responding to Bennington's text at every turn is Derrida's own excerpts from his life and thought that appearing at the bottom of each page resist circumscription Together these texts as a dialogue and a contest constitute a remarkably in depth critical introduction to one of the leading philosophers of the twentieth century and at the same time demonstrate the illusions inherent in such a project Bennington's account of Derrida

broader in scope than any previously done leads the reader through the philosopher's familiar yet still widely misunderstood work on language and writing to the less familiar and altogether more mysterious themes of signature sexual difference law and affirmation Seeking to escape this systematic rendering in fact to prove it impossible Derrida interweaves Bennington's text with surprising and disruptive periphrases reflections on his mother's death agony commentaries on St Augustine's Confessions memories of childhood remarks on Judaism and references to his collaborator's efforts This extraordinary book offers on the one hand a clear and compelling account of one of the most difficult and important contemporary thinkers and on the other one of that thinker's strangest and most unexpected texts Far from putting an end to the need to discuss Derrida Bennington's text might have originally intended or pretended this dual text opens new dimensions in the philosopher's thought and work and extends its challenge

From Life to Survival Robert Trumbull, 2022-01-04 Contemporary continental thought is marked by a move away from the linguistic turn in twentieth century European philosophy as new materialisms and ontologies seek to leave behind the thinking of language central to poststructuralism as it has been traditionally understood At the same time biopolitical philosophy has brought critical attention to the question of life examining new formations of life and death Within this broader turn Derridean deconstruction with its apparent focus on language writing and textuality is generally set aside This book by contrast shows the continued relevance of deconstruction for contemporary thought's engagement with resolutely material issues and with matters of life and the living Trumbull elaborates Derrida's thinking of life across his work specifically his recasting of life as life death and in turn survival or living on Derrida's activation of Freud Trumbull shows is central to this problematic and its consequences especially deconstruction's ethical and political possibilities The book traces how Derrida's early treatment of Freud and his mobilization of Freud's death drive allow us to grasp the deconstructive thought of life as constitutively exposed to death the logic subsequently rearticulated in the notion of survival Derrida's recasting of life as survival Trumbull demonstrates allows deconstruction to destabilize inherited understandings of life death and the political including the dominant configurations of sovereignty and the death penalty

Hermeneutics and Deconstruction Hugh J. Silverman, Don Ihde, 1985-09-30 Hermeneutics and Deconstruction provides an assessment of two dominant modes of thinking and writing in continental philosophy today It addresses central issues in the theory of interpretation and in the strategies of textual reading Placed in the context of contemporary philosophical practice this volume raises the question of the end of philosophy and offers different ways of understanding how the question of closure in philosophy can itself open up a whole range of philosophical activities Special attention is given to the practice of interpretation in the areas of science perception and literature and to the dimensions of hermeneutic understanding with respect to being life and the world An investigation of how history is interpreted and read as a text provides access to one of the significant differences between hermeneutic understanding and deconstructionist practice A section is devoted to the controversy concerning the value and the achievement of deconstruction The writings of Heidegger

and Derrida are juxtaposed and examined And the volume concludes with several indications of new directions in continental philosophy and various versions of what a post Derridean reading might entail Derrida Christina Howells, 2013-04-24 This book is an unusually readable and lucid account of the development of Derrida's work from his early writings on phenomenology and structuralism to his most recent interventions in debates on psychoanalysis ethics and politics Christina Howells gives a clear explanation of many of the key terms of deconstruction including difference trace supplement and logocentrism and shows how they function in Derrida's writing She explores his critique of the notion of self presence through his engagement with Husserl and his critique of humanist conceptions of the subject through an account of his ambivalent and evolving relationship to the philosophy of Sartre The question of the relationship between philosophy and literature is examined through an analysis of the texts of the 1970s and in particular Glas where Derrida confronts Hegel's totalizing dialectics with the fragmentary and iconoclastic writings of Jean Genet The author addresses directly the vexed questions of the extreme difficulty of Derrida's own writing and of the passionate hostility it arouses in philosophers as diverse as Searle and Habermas She argues that deconstruction is a vital stimulus to vigilance in both the ethical and political spheres contributing significantly to debate on issues such as democracy the legacy of Marxism responsibility and the relationship between law and justice Comprehensive cogently argued and up to date this book will be an invaluable text for students and scholars alike **The Architecture of Deconstruction** Mark Wigley, 1993 By locating the architecture already hidden within deconstructive discourse Wigley opens up more radical possibilities for both architecture and deconstruction
