Handbook of Health Services Evaluation Axel Kaehne, Julie Feather, 2025-07-28 This handbook offers a comprehensive overview of the theories, methods, and practices in evaluating health services. Written by international experts and practitioners in the field, it is an essential resource for anyone who plans or conducts evaluations of health care organisations, as well as for those who want to learn more about the strengths and limitations of specific evaluation techniques and methods. The individual chapters summarise the latest evidence and good practice of established, tried, and tested evaluation approaches, as well as novel and innovative evaluation techniques in clinical and health organisational settings. The handbook comprises chapters on a wide range of topics, such as digital technologies, leadership in health services, trauma-informed evaluation, harm reduction in evaluation, learning health systems, and collective impact design. Each chapter provides a state-of-the-art summary of the current evaluation practice, together with up-to-date references to existing published research.

Teaching AI Literacy Across the Curriculum Irina Lyublinskaya, Xiaoxue Du, 2025-07-10 AI is reshaping the future of education. Are your students ready? In an era where artificial intelligence (AI) is revolutionizing every facet of life, from how we shop to how we get our news, it's inevitable that AI is changing the way we teach and the way students learn. For students to thrive in this world, they need more than just the ability to use technology; they need to understand how it works, its potential, and its limitations. They need AI literacy. *Teaching AI Literacy Across the Curriculum* delves into the symbiotic relationship between AI and education, providing cutting-edge research and practical strategies to seamlessly incorporate AI literacy into teaching across disciplines. Authors Irina Lyublinskaya and Xiaoxue Du introduce a pedagogical framework for teaching AI literacy that explores the Big Five Ideas in AI and integrates with practical strategies for teaching AI core concepts across different subjects. Divided into three parts focusing on theoretical foundations, practical examples, and assessment of AI literacy, this book offers guidance on integrating AI literacy across various subjects, such as Science, Mathematics, English Language Arts, and Social Studies. It provides real-world examples that provoke thoughtful discussions on the ethical considerations and biases inherent in AI. It helps teachers foster critical thinking to ensure that students are well-prepared for the AI-driven future. Includes a companion website with access to a wealth of resources, such as lesson plans and supplemental materials, templates, and graphic organizers to support AI education in the classroom. By weaving AI concepts into the educational tapestry, this book serves as a valuable resource for educators, offering practical strategies and insights to cultivate a generation of learners who are not only technologically adept but also critically engaged with the ethical and societal implications of AI.
