Kronk, Maik Meyer, 2024-05-30 This two volume catalog is the first in depth investigation of comets that were reported since the 17th century but not confirmed and subsequently lost Volume 2 covers objects observed between 1900 and the present a period that was dominated by photographic observations and the detection of much fainter objects This book provides a distinctive blend of the historical and cultural aspects of comet hunting and discovery along with the utilization of contemporary tools in orbital mechanics and data analysis This comprehensive compilation offers a thorough catalog of unconfirmed comets Each case encompasses a detailed presentation of observations a discussion on the observer when feasible an examination of the historical context and a conclusive analysis of the object's nature The book predominantly showcases original material and photographs sourced from observatories libraries and historical societies worldwide exposing a significant number of illustrations that have never been previously published While some of these unconfirmed comets were determined to be misidentifications of minor planets artifacts caused by emulsion or optical effects or inaccurate observations of comets that were already under observation the Authors did manage to identify numerous objects that were likely genuine comets These observations hold potential value for the future as they could be observations of periodic comets yet to be formally identified In a handful of instances the Authors were also able to find new observations which led to the calculation of orbits for the first time enabling a formal announcement or identifying suspected comets that were already known to be periodic comets **Ignition Hazard** Fabienne Gschwind, 2025-07-03 Timea is a brilliant safety expert specialized in explosion prone facilities and toxic chemicals But soon after starting at an international polymer corporation she becomes entangled in a web of chaotic acquisitions dubious financial flows and a secret virus laboratory When she gets too close to the truth a perfectly staged laboratory accident is planned to take her out Amid safety inspections cyberattacks and the madness of project management Timea fights for her life and for everyone's safety IGNITION Hazard is a high tension industrial thriller about modern research safety standards and global power plays humorous fictional and with a wink at the absurdities of working life *Computerworld* , 1999-05-24 For more than 40 years Computerworld has been
