Entrepreneur ,1993 **Group Cognition** Gerry Stahl,2006 Exploring the software design social practices and collaboration theory that would be needed to support group cognition collective knowledge that is constructed by small groups online Innovative uses of global and local networks of linked computers make new ways of collaborative working learning and acting possible In Group Cognition Gerry Stahl explores the technological and social reconfigurations that are needed to achieve computer supported collaborative knowledge building group cognition that transcends the limits of individual cognition Computers can provide active media for social group cognition where ideas grow through the interactions within groups of people software functionality can manage group discourse that results in shared understandings new meanings and collaborative learning Stahl offers software design prototypes analyzes empirical instances of collaboration and elaborates a theory of collaboration that takes the group rather than the individual as the unit of analysis Stahl s design studies concentrate on mechanisms to support group formation multiple interpretive perspectives and the negotiation of group knowledge in applications as varied as collaborative curriculum development by teachers writing summaries by students and designing space voyages by NASA engineers His empirical analysis shows how in small group collaborations the group constructs intersubjective knowledge that emerges from and appears in the discourse itself

This discovery of group meaning becomes the springboard for Stahl's outline of a social theory of collaborative knowing. Stahl also discusses such related issues as the distinction between meaning making at the group level and interpretation at the individual level, appropriate research methodology, philosophical directions for group cognition theory, and suggestions for further empirical work.
