### ChatGPT Best Practices

What is ChatGPT?

ChatGPT is a computer program created by OpenAI that is designed to understand and generate human language. It was trained using a type of artificial intelligence, known as natural language processing (NLP), which allows it to understand and generate human language. ChatGPT can generate responses to questions or prompts in a way that is often indistinguishable from human responses, although it is not perfect. It can be used to generate text, answer questions, and provide information.
