elementary school to university level classrooms It is about the use of creative instructional strategies in K 12 class room
settings and the transformations the teachers made in their journeys from being traditional practitioners to becoming
pedagogical in their approaches to teaching and learning across the curriculum Over twenty teachers conducted research in
their classrooms on the implementation of creative strategies tactics graphics organizers and visual journals in teaching and
learning They have written their inquiries in a narrative style informed by various forms of arts based educational research
Their research is approachable and usable by other teachers who are interested in becoming reflective reflexive practitioners
Many of the strategies tactics and graphics organizers are described by Barrie Bennett in his widely used textbook Beyond
Monet The Artful Science of Instructional Intelligence However through their journeys of becoming teacher learner
researchers many discovered numerous creative variations of Bennett s work as it was implemented in their classrooms
While there are many professional books that provide ideas on collaborative learning and creative teaching approaches there
is very little published research on the efficacy of these concepts in the K 12 classroom These inquiries provide practical
insights into how inspired teachers can conduct research on improving their own practice as well as on greatly improving
their students learning **High Points in the Work of the High Schools of New York City** ,1929 **Bulletin of High**
