Highly Rated Ai Customer Support Bot Ideas In 2025:

The Nature of Business Transformation Richard Kelly, 2022-03-17 This book is a practical guide for business professionals to develop and improve business intelligence and collective decision making within their organisation. It proposes a progressive reconfiguration of the traditional business operating system using a nature inspired framework called swarm facilitation that enables and facilitates collective decision making. Organisations have followed the same rigid formula of problem solving and decision making for over 100 years. It is dominated by centralised governance and pyramid decision making. Such an approach is no longer fit for purpose in an environment of employee disengagement, artificial intelligence, AI superintelligence and Covid 19 fallout. By the end of this book, readers will be able to solve organisational problems and challenges collectively using swarm intelligence, upgrade and future proof business operating systems to reflect a more collective decision making approach fit for the new connected economy and Industry 4.0, embrace mindset quotients that support people working in a more networked, self-organising and collective environment. The book is important reading for leaders and managers who are focused on building organisational capital and engagement and gaining value from the emerging technology by evolving their business operating system into a digital ecosystem as part of an ongoing digital transformation strategy. It will also appeal to experts working in the field of organisational change and development both within the organisation and as consultants.

High-Performance Automation Methods for Computational Intelligent Systems Vijay Kumar Sharma, Sachin Kumar Gupta, 2025-09-17 Intelligent computation is the need of the current society. This field attracts significant attention due to its application-oriented systems. It is essential for implementing various society-related solutions. Automation methods help improve the quality of life and support the development of efficient systems. The available theories and concepts are implemented for the benefit of society, drastically changing the world. The advancement of the existing ideas is simulated in the scenario of future intelligent automation systems. The complicated problems can be easily solved using the mentioned approaches. The decisive nature of the algorithms builds the system more intelligent. This book targets current trends in the relevant field and outlines a path for the development of future automated systems. The intelligence behaviour of the systems is the prime requirement for the age development. The gaps in the current development scenarios need to be identified and bridged by incorporating highly efficient algorithms, ideas and working prototypes. This book presents a comprehensive survey, performance analysis and time complexity comparison of machine learning techniques in network security. Discusses energy efficient hybrid algorithms for reconfiguration in radial distribution systems. Covers a detailed examination of automation approaches for the study and detection of disparate leaf diseases using computational intelligent systems. Illustrates applications of quantum cellular energy efficient computing methods for automation. Explains cybersecurity strategies for advanced computational intelligence and customer segmentation through machine learning techniques. The book is primarily written for senior undergraduates, graduate students and academic researchers in the fields
