initiated and passion driven Outlining the concrete instruments of governance of the local state the author argues that transnational talent from elite schools or elite professions is often entrepreneured in China Moreover she argues that the different standards of selection of entrepreneurial talents by state and market actors create localised precarious conditions for them This book offers fascinating insights into the contradictions inherent in the Chinese model of entrepreneurship Start up Wolf will appeal to scholars and students of China studies the anthropology of entrepreneurship science and technology studies and economic geography as well as business practitioners interested in innovation and high tech start ups The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license
