Crisis In Algeria:

The Agony of Algeria Martin Stone, 1997 Stone provides a brief historical overview of Algeria since 1830 before focusing on three crucial phases of the postcolonial era that of Ben Bella and Boumedienne the reform era of Chadli Benjedid and the political and economic crisis under the Higher States Committee HCE He examines the dominant state institutions the army and the FLN and outlines the increasingly bitter divisions social and political which account for the current crisis Since the Algerian military annulled an election in January 1992 that would have brought to power the world's first democratically elected Islamist government a civil war has raged in which more than 100 000 Algerians have died The military takeover polarized the country between the political and military elite and the mass of the population The elite were perceived as interested only in personal gain and holding on to power while most Algerians faced intense hardship But the brutality of the Islamists insurgency including car bombings the murder of immodestly dressed women the assassination of intellectuals and the wiping out of whole villages has lost them support Most Algerians no longer want the Islamic republicanism of the FIS or the millenarianism of the GIA Martin Stone provides a brief overview of Algeria since 1830 before focusing on three crucial phases of the postcolonial era those of Ben Bella Boumedienne and the reformist Chadli Bendjedid and the political and economic crisis under the Haut Comit d tat HCE He examines the dominant state institutions the army and the FLN and the increasingly bitter divisions behind the current conflict especially the factionalism that has hampered ALgeria's attempts to realize its great potential The book also deals with the large Berber minority relations with France the economic background foreign policy the 1997 elections and the administration of President Lamine Zeroual In conclusion it examines whether the state can reconcile the moderate conservative Islam of the majority with the minorities on either pole both Islamic radicals and secularists and create a political landscape where genuine political pluralism can flourish and extremism be suppressed

Impressions of the Crisis in Algeria Germaine Mason, 1956 **Algeria in Transition** Ahmed Aghrout, Redha. M Bougherira, 2004-08-02 This book by providing an up to date systematic analytical account on transformations in Algeria makes a valuable contribution to the literature on this country that has not yet received much attention in the Anglo American academy Its distinctive feature is that it entirely focuses on Algeria thus departing from existing studies dealing with the entire geographical area of North Africa or the Maghreb **Algeria's Impasse** , 1995 **War In Algeria**

Background For Crisis Tanya Matthews, 2023-07-18 Tanya Matthews provides a comprehensive overview of the Algerian War which was fought for independence from France in the 1950s and 1960s She analyzes the causes of the conflict the strategies employed by the combatants and the impact of the war on Algeria and France This book is a must read for anyone interested in the history of decolonization and its aftermath This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no

Algeria Ivan Martin, 1998 The Algerian civil conflict has been explained in terms of cultural religious and political processes if not considered either as a test case for the clash of civilizations or as an evidence of the purported fundamentalist drift of islam at odds with modern society However an analysis of the socioeconomic development model implemented by the post colonial Governments from 1962 through 1988 delivers a revealing albeit partial logical framework for the crisis The Algerian development model relied on the income from hydrocarbons exports as the only source of finance for development and capital build up The absolute priority attached to a capital and foreign technology intensive industrialization policy focused on heavy industries combined with neglect of agriculture to cause a massive rural migration to city suburbs lacking all kinds of infrastructure and even housing facilities as well as a virtually full food dependency This resulted in the exclusion from the economic system of large segments of the population bound to unemployment or outright poverty Algeria became a paradoxical case of dual outward looking specialized dislocated economy The fast population growth and the young demographic structure together with this lack of economic opportunities built the sociological background in which the islamic political groups thrived as the only real social policy alternative The Algerian crisis may be understood in terms of political economy of oil income appropriation

The Suspended Disaster Thomas Serres, 2023-09-05 After Algeria s president Abdelaziz Bouteflika announced his intention to run for a fifth term in early 2019 a popular peaceful uprising erupted calling for change Bouteflika who had been in office since 1999 was eventually forced to resign but the Hirak movement continued to protest the country s inequalities and

entrenched ruling elite The Suspended Disaster examines the dynamics of the Algerian political system offering new insights into the last years of Bouteflika's rule and the factors that shaped the emergence of an unexpected social movement Thomas Serres argues that the Algerian ruling coalition developed a mode of government based on the management of a seemingly never ending crisis marked by an obsession with security and the ever present possibility of unrest violence and economic collapse Identifying this form of rule as governance by catastrophization he shows how attempts to preserve the status quo through emergency policies and constant reforms can also lay the groundwork for a revolutionary situation Serres contrasts the government's portrayal of perpetually imminent disaster with the uncertainty precarity and indignity experienced by much of the population which fueled the rejection of ruling elites a profound mistrust toward institutions and new spaces for grassroots opposition Based on extensive fieldwork and theoretically novel The Suspended Disaster sheds new light on the political economic and social processes underlying an uprising that changed the face of Algerian politics

The Foreign Policies of the European Union and the United States in North Africa Francesco Cavatorta,Vincent Durac,2013-09-13 The war in Iraq seemed to bring to a head underlying differences between the United States and the vast majority of European countries regarding the best means to maintain international peace and stability The unilateralism of the United States as opposed to the multilateralism of the European Union is seen as a very significant source of potential rivalry between the two actors This volume examines in detail whether the policies of the United States and the EU are truly diverging with respect to the most pressing issues facing North Africa or whether in fact they are converging in terms of objectives to be achieved and strategies for their implementation Through a number of papers that include both comparative and case specific studies this book enables a better understanding of the differences and similarities in EU and US foreign policies and security strategies for the region a clearer analysis of their respective democracy promotion policies and a better examination of their respective approach to the Islamist question in light of the continued success of such movements This book was originally published as a special issue of the Journal of North African Studies
