Solving the American Health Care Crisis Malhotra Umang

Malhotra, Umang Malhotra, 2009-11 Surprisingly America ranks 54 worldwide in access to health care Solving the American Health Care Crisis lays open the issues challenges Americans to think for themselves and reveals how learning from other countries can help to create truly the best health care system in the world In the span of his career as an international businessman and entrepreneur Umang Malhotra has voyaged through nearly eighty countries and he shares his vast knowledge of health care in other nations In a commonsense book aimed at the public and policymakers alike he provides a fresh unbiased view of the flaws inherent in the American health care system while examining how other affluent nations manage to provide quality universal health care coverage for half the cost per person After the death of his best friend who did not have American health insurance when he fell ill while visiting the United States Malhotra wondered why the richest country in the world treats health care as a privilege rather than as a basic right unlike other industrialized nations He reveals how other countries approach health care while examining the critical economic social and political issues that America must resolve in the belief that we can only make progress when the average person understands fully the real issues behind the crisis The book presents compelling solutions for an affordable high quality and accessible universal system while answering key questions and asking some very pointed ones in return The reader is left well armed to think the issue through

Critical Tom Daschle, Scott S. Greenberger, Jeanne M. Lambrew, 2008-02-19 A much needed and hard hitting plan from one of the great Democratic minds of our time to reform America's broken health care system Undoubtedly the biggest domestic policy issue in the coming years will be America's health care system Millions of Americans go without medical care because they can't afford it and many others are mired in debt because they can't pay their medical bills It's hard to think of another public policy problem that has lingered unaddressed for so long Why have we failed to solve a problem that is such a high priority for so many citizens Former Senate Majority Leader Tom Daschle believes the problem is rooted in the complexity of the health care issue and the power of the interest groups doctors hospitals insurers drug companies researchers patient advocates that have a direct stake in it Rather than simply pointing out the major flaws and placing blame Daschle offers key solutions and creates a blueprint for solving the crisis Daschle's solution lies in the Federal Reserve Board which has overseen the equally complicated financial system with great success A Fed like health board would offer a public framework within which a private health care system can operate more effectively and efficiently insulated from political pressure yet accountable to elected officials and the American people Daschle argues that this independent board would create a single standard of care and exert tremendous influence on every other provider and payer even those in the private sector After decades of failed incremental measures the American health care system remains fundamentally broken and requires a comprehensive fix With his bold and forward looking plan Daschle points us to the solution *In Critical*
