Critical Communications Review Volume 1 Labor The Working Class And The Media Critical Communication Review:

The Critical Communications Review: Labor, the working class, and the media Vincent Mosco, Janet Wasko, 1983
Labor, Class Formation, and China's Informationized Policy of Economic Development Yu Hong, 2011-03-31 In Labor Class Formation and China's Informationized Policy of Economic Development Yu Hong examines crucial connections between the evolving political economy of information and communications technology ICT and the reconstitution of class relations in China Situating China's ICT development over the last thirty years at the intersection of transnational trends domestic policies and institutional arrangements Hong shows how evolving class relations in the ICT sector are shaped by and shaping the transnational capitalist dynamics and domestic socio economic transformations She goes on to argue that the huge and still expanding pool of Chinese ICT workers and their newly attained identities as wage labor rather than consumers constitute a missing but important dimension of human experiences of the rise of the information society The Handbook of Communication History Peter Simonson, 2013 The Handbook of Communication History addresses central ideas social practices and media of communication as they have developed across time cultures and world geographical regions It attends to both the varieties of communication in world history and the historical investigation of those forms in communication and media studies The Handbook editors view communication as encompassing patterns processes and performances of social interaction symbolic production material exchange institutional formation social praxis and discourse As such the history of communication cuts across social cultural intellectual political technological institutional and economic history The volume examines the history of communication history the history of ideas of communication the history of communication media and the history of the field of communication Readers will explore the history of the object under consideration relevant practices media and ideas review its manifestations in different regions and cultures comparative dimensions and orient toward current thinking and historical research on the topic current state of the field As a whole the volume gathers disparate strands of communication history into one volume offering an accessible and panoramic view of the development of communication over time and geographical places and providing a catalyst to further work in communication history *Critical Communications Review* Vincent Mosco, Janet Wasko, 1984 This volume of The Critical Communications Review examines the shifting strategies of control over information and communication resources The articles explore the consequences of the ongoing restructuring of communication systems as critical researchers examine the role of information in the revitalization of the capitalist system in new and evolving forms of social and political control and in the reshaping of the cultural sphere **The Critical Communications Review**, 1984 The Critical Communications Review: Popular culture and media events Vincent Mosco, Janet Wasko, 1983 Symbiosis Ray Broadus Browne, Marshall William Fishwick, 1988 These essays written by experts in their fields demonstrate how necessary it is in the study of the humanities

and social sciences to realize the interdependency of the fields and how rich the resulting study can be *Mass Communication Research Methods: Researching media institutions, organisations, professionals and production (continued).*

Political economy (media institutions). The political economy of communications Anders Hansen, 2009 *Rethinking Communication* International Communication Association, 1989-03 This second volume of the two volume set *Rethinking Communication* presents examples of the diversity of perspectives and theoretical problems that currently occupy the attention of the field Each of the 30 chapters exemplify a particular paradigm or perspective by describing a body of work or a particular research project Seeing the diversity of the field as a response to the realities of an increasingly pluralistic world the editors hope this and the companion volume will help explain where the field is headed so scholars can seek answers to such questions as how to constitute a scholarly community in the face of existing pluralism how to construct a coherent educational curriculum and how to determine standards of evaluation *The Political Economy of Communication* Vincent Mosco, 1996-10-14 What is political economy and how can it be applied to the study of media communication The Political Economy of Communication is the definitive critical overview of the discipline for students of the social sciences It explains in detail the analytic tools that political economy can apply to today's increasingly global and technological information society Mosco presents an historical overview of the discipline and defines political economy by its focus on the relation between the production distribution and consumption of communication in historical and cultural context This comprehensive analysis of the commodity form in communication includes an examination of print broadcast and new electronic media the role and function of the audience and the problem of social control It concludes by addressing the relationship of political economy to the increasingly important fields of policy studies and cultural studies **Book Review Digest**, 1985 *Javnost*, 1997

The Pay-Per Society Vincent Mosco, 1989 **Communicating Labour Internationalism** Peter Waterman, 1985

Taking Stock, Placing Orders Carol Smith, Carolyn Stewart Dyer, 1992 Communication Research, 1997

Democratizing Communication? Mashoed Bailie, Dwayne Roy Winseck, 1997 This volume considers the implications of recent economic and technological restructuring for public communication It explores how instrumental conceptions of communication divorced from concepts of citizenship power and democracy frustrate the potentials of the technologies

Advances in Telematics, Volume 1 Indu B. Singh, Jarice Hanson, 1991-01-01 Global Productions Gerald Sussman, John A. Lent, 1998 This volume discusses the Information Society from the perspective of the work forces it employs The book focuses on the changes occurring at the sites of production of communication and information commodities in both industrial and less developed countries **Censorship** Sue Curry Jansen, 1988 Sue Curry Jansen here challenges conventional thought with a bold new view that censorship is as much a feature of liberal market societies as it is of totalitarianisms Jansen addresses the notion of market censorship and shows how the marketplace has become an arena for liberal power knowledge She also analyzes Marx's critique of bourgeois censorship examines censorship at various levels of Soviet society and takes

an incisive look at economic censorship within our own capitalist nation
