Satterthwaite, 2015-12-08 Although it has been recognized that Edmund Spenser's poetry owes a debt to the work of the
French poets of the Pléiade particularly to Joachim du Bellay and Pierre de Ronsard there has been no critical analysis of this
relationship Mr Satterthwaite compares the work of the three poets showing the relation between the English movement to
write quantitative verse and the French experiments in vers mesurés He discusses the attitudes of the poets to their Muses
and to contemporary literature their ideas of time and mutability their moral or amoral views of literature and of life their
religious orientation and their use of the Platonic and neo Platonic theories that were a part of the inherited culture of the

Elder Art Discourse in the Sixteenth Century Netherlands examines the later images by Bruegel in the context of two
contemporary discourses art theoretical and convivial The first concerns the purely visual interactions between artists and
artistic practices that unfold in pictures which often transgress the categorical boundaries modern scholars place on their
work such as sacred and profane antique and modern and Italian and Northern In this context the images themselves those
of Bruegel his contemporaries and predecessors make up the primary source material from which the author argues The
second deals with the dialogue that occurred between viewers in front of pictures and the way in which pictorial strategies
facilitated their visual experience and challenged their analytical capabilities In this regard the author expands his base of
primary sources to include convivial texts dialogues and correspondences and texts by rhetoricians and Northern humanists
addressing art theoretical issues Challenging the conventional wisdom that the artist eschewed Italianate influences this
study demonstrates how Bruegel's later peasant paintings reveal a complicated artistic dialogue in which visual concepts and
pictorial motifs from Italian and classical ideas are employed for a subject that was increasingly recognized in the sixteenth
century as a specifically Northern phenomenon Similar to the Dutch rhetorician societies and French Pléiade poets who

cultivated the vernacular language using classical Latin the function of this inter pictorial discourse the author argues was not simply to imitate international trends a common practice during the period but to use it to cultivate his own visual vernacular language Although the focus is primarily on Bruegel s later work the author s conclusions are applied to sketch a broader understanding of both the artist himself and the vibrant artistic dialogue occurring in the Netherl *Loci critici passages illustrative of critical theory and practice from Aristotle downwards, selected, partly tr. and arranged with notes by G.
