offers 19 lesson outlines involving critical thinking reading and writing at the elementary level while the following section on secondary education also offers 19 such lessons Each lesson includes a brief description objectives and procedures A 28 item annotated bibliography at the end of the book contains references to additional lessons and resources for incorporating critical thinking reading and writing into the classroom SR     Resources in Education ,1990     **Keywords in Composition Studies** Paul Heilker,Peter Vandenberg,1996 Keywords in Composition Studies is the first systematic inquiry into the vocabulary of writing teachers and theorists In brief yet heavily researched essays contributors explore the development of and interconnections among fifty five of the most consequential words in the field It is with these critical terms that the contemporary field of composition has been composed and in this sense Keywords in Composition Studies is an introduction to the principal ideas and ideals of compositionists Yet this book is neither a dictionary nor an encyclopedia it does not attempt to capture the established knowledge of a unified discipline through its vocabulary but rather explores the multiple layers of meaning inhabiting the words writing teachers and theorists have depended and continue to depend on most Each essay begins with the assumption that its central term is important precisely because its meaning is open overdetermined The purpose of each essay is to foreground a range of meaning signified by its central term rather than to pinpoint a meaning In this sense Keywords in Composition Studies is a practical model for reading the texts of an expanding and unsettled field
