Critical Thinking in Psychology John Ruscio, 2005-07-26 Can your students distinguish between the true science of human thought and behavior and pop psychology **CRITICAL THINKING IN PSYCHOLOGY SEPARATING SENSE FROM NONSENSE** provides a tangible and compelling framework for making that distinction by using concrete examples of people's mistaken analysis of real world problems Stressing the importance of assessing the plausibility of claims John Ruscio uses empirical research such as the Milgram experiment to strengthen evidence for his claims and to illustrate deception self deception and psychological tricks throughout the text Outlines and Highlights for Critical Thinking in Psychology Cram101 Textbook Reviews, 2008-02 Never HIGHLIGHT a Book Again Virtually all of the testable terms concepts persons places and events from the textbook are included Cram101 Just the FACTS101 studyguides give all of the outlines highlights notes and quizzes for your textbook with optional online comprehensive practice tests Only Cram101 is Textbook Specific Accompanys 9780534634599 *Clear Thinking with Psychology* John Ruscio, 2002 Do your students have the tools to distinguish between the true science of human thought and behavior and pop psychology Ruscio's new book provides a tangible and compelling framework for making that distinction Because we are inundated with scientific claims the author does not merely differentiate science and pseudoscience but goes further to teach the fundamentals of scientific reasoning on which students can base their evaluation of information **The Teacher's Guide to Media Literacy** Cyndy Scheibe, Faith Rogow, 2012 A Deeper Sense of Literacy is the first book to suggest that media literacy is both a content area and an approach to teaching that can be integrated into any subject area It combines theory and practical application in a way that addresses the most important questions related to media literacy in education today what is it why is it important how can you teach it across a wide range of curriculum areas and grade levels and does it work Rather than focusing on how to teach media literacy Scheibe and Rogow focus on actually using media literacy to teach lessons across the content areas

Idea-Based Learning Edmund J. Hansen, 2023-07-03 Synthesizing the best current thinking about learning course design and promoting student achievement this is a guide to developing college instruction that has clear purpose is well integrated into the curriculum and improves student learning in predictable and measurable ways The process involves developing a transparent course blueprint focused on a limited number of key concepts and ideas related tasks and corresponding performance criteria as well as on frequent practice opportunities and early identification of potential learning barriers Idea based Learning takes as its point of departure the big conceptual ideas of a discipline that give structure and unity to a course and even to the curriculum as opposed to a focus on content that can lead to teaching sequences of loosely related topics and aligns with notions of student centered and outcomes based learning environments Adopting a backwards design model it begins with three parallel processes first identifying the material that is crucial for conceptual understanding second articulating a clear rationale for how to choose learning outcomes based on student needs and intellectual readiness

and finally aligning the learning outcomes with the instructional requirements of the authentic performance tasks The resulting syllabi ensure cohesion between sections of the same course as well as between courses within a whole curriculum assuring the progressive development of students skills and knowledge Key elements of IBL include Helping students see the big picture Building courses around one or more authentic performance tasks that illuminate the core concepts of the discipline Clearly identifying performance criteria for all tasks Incorporating practice in the competencies that are deemed important for students success By placing the onus of learning on the student liberating faculty to take on the role of learning coaches Designing tasks that help students unlearn simplistic ideas and replace them with improved understandings Edmund Hansen expertly guides the reader through the steps of the process providing examples along the way and concluding with a sample course design document and syllabus that illustrate the principles he propounds **Evidence-Based Practice in**
